

Solar Irradiance Comparison: 120–121 nm

UARS SOLSTICE V18 Irradiance Data [0 samples screened in plot window]

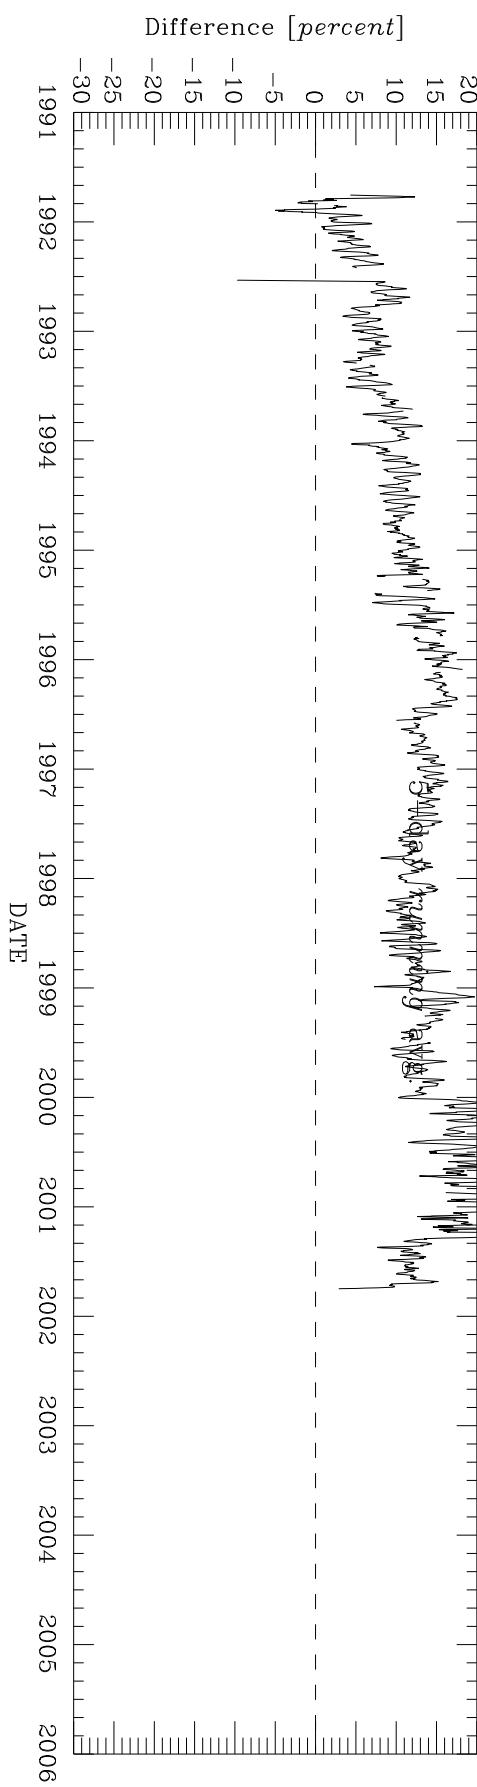

Calculated Irradiance Variation [SET Mg II index + Woods et al. (2000) contrast factors]

Average contrast factors = -0.88, 7.19, 4.97

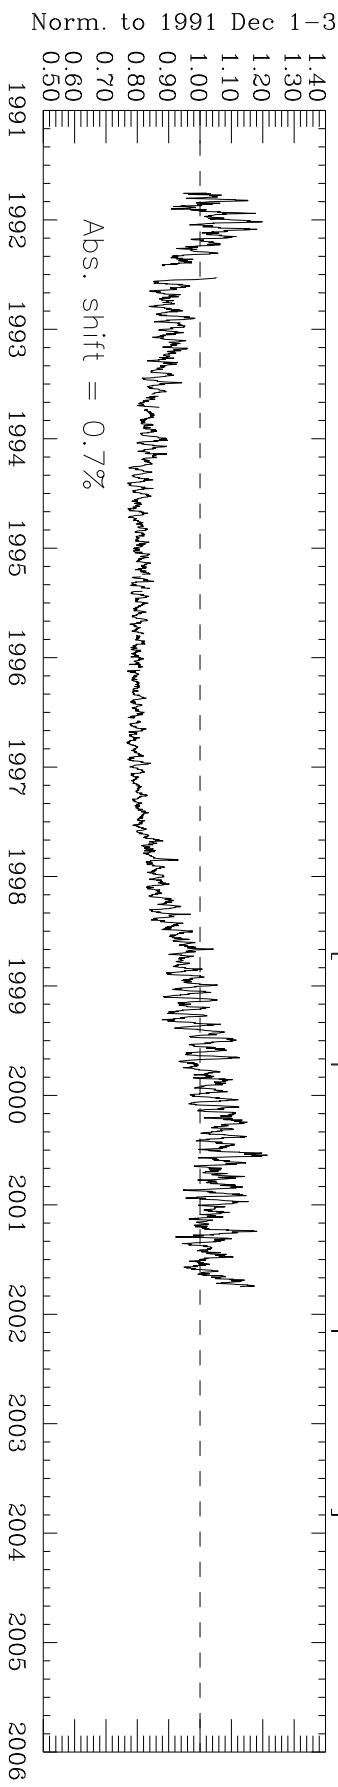

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

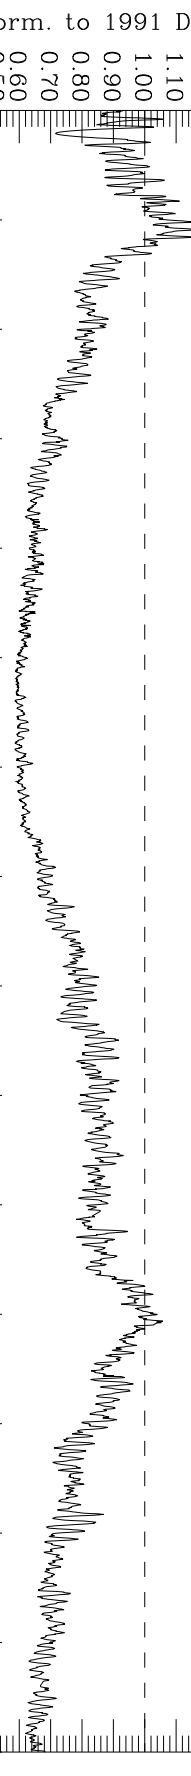

Solar Irradiance Comparison: 122–124 nm

UARS SOLSTICE *V18* Irradiance Data [0 samples screened in plot window]

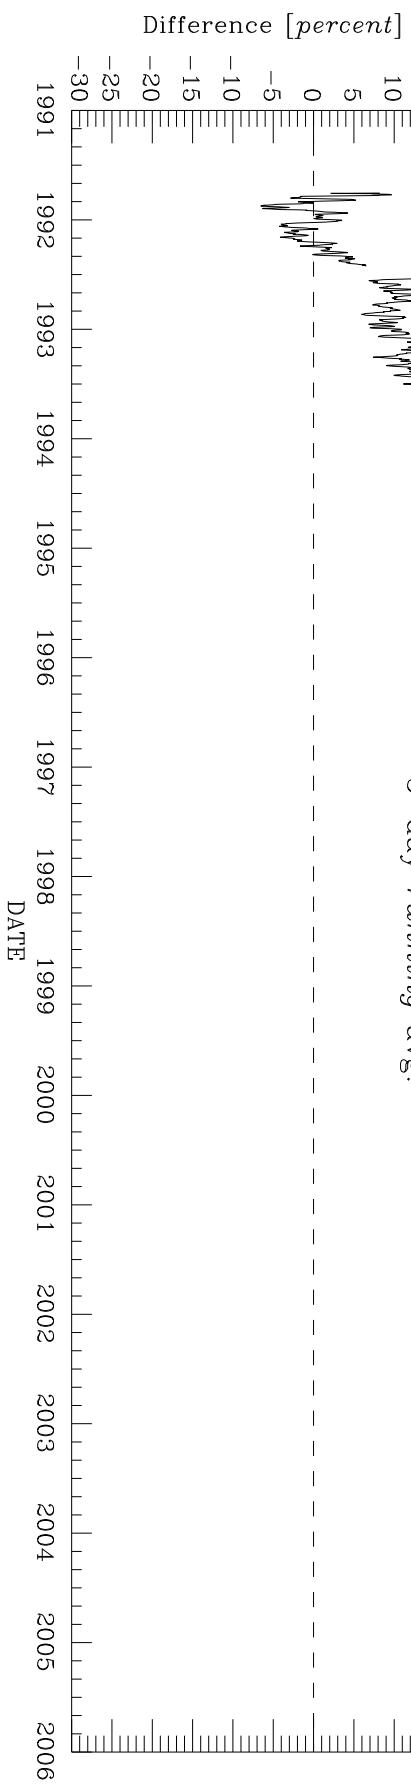

Calculated Irradiance Variation [SET Mg II index + Woods et al. (2000) contrast factors]

Average contrast factors = -22.53, 181.40, 105.80

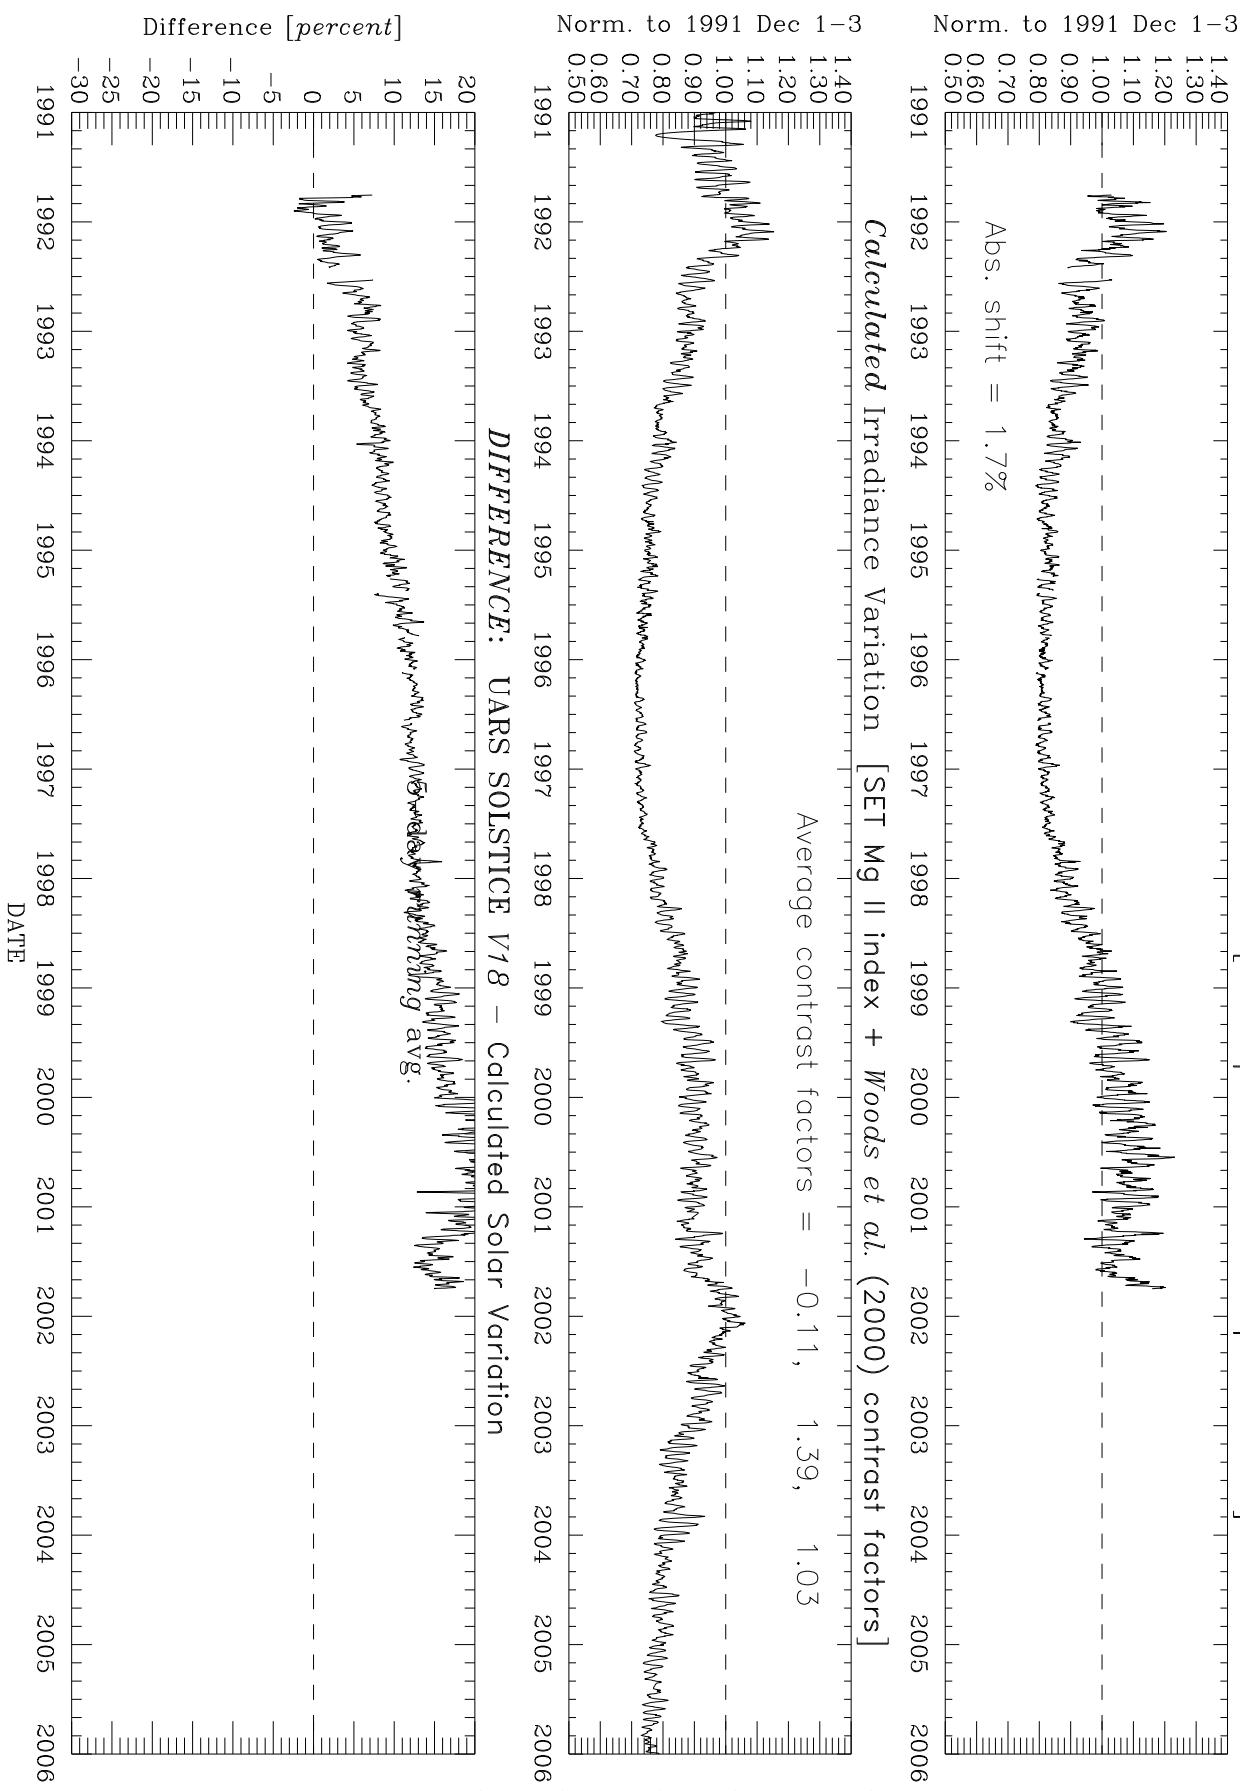

*DIFFERENCE: UARS SOLSTICE *V18* – Calculated Solar Variation*

5-day running avg.

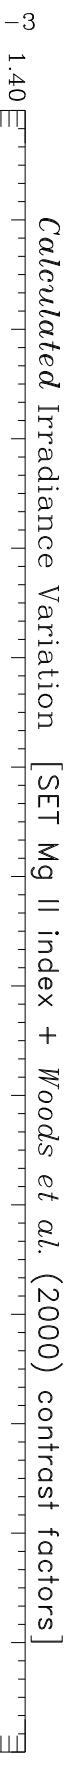

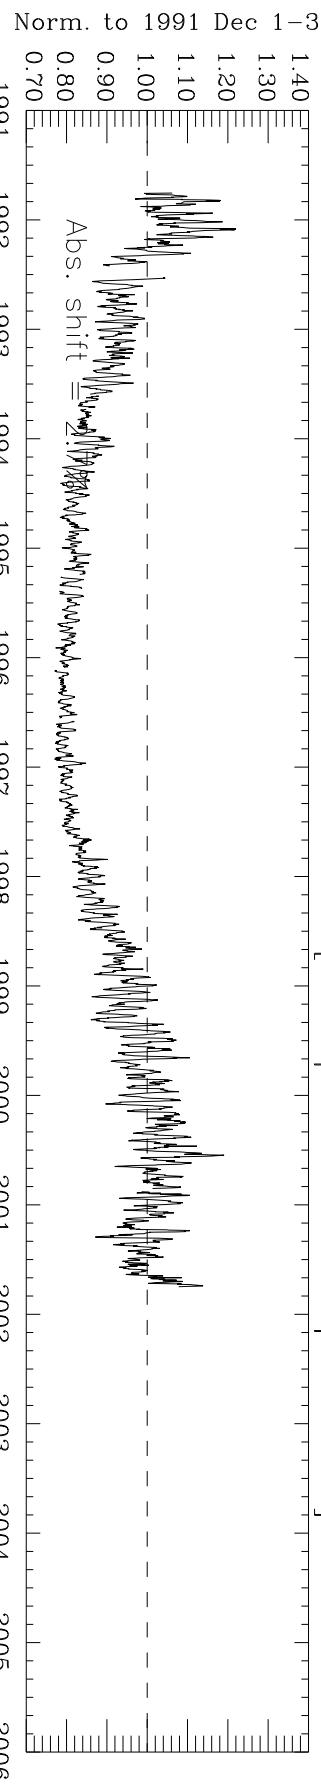

Solar Irradiance Comparison: 125–129 nm

UARS SOLSTICE V18 Irradiance Data [0 samples screened in plot window]

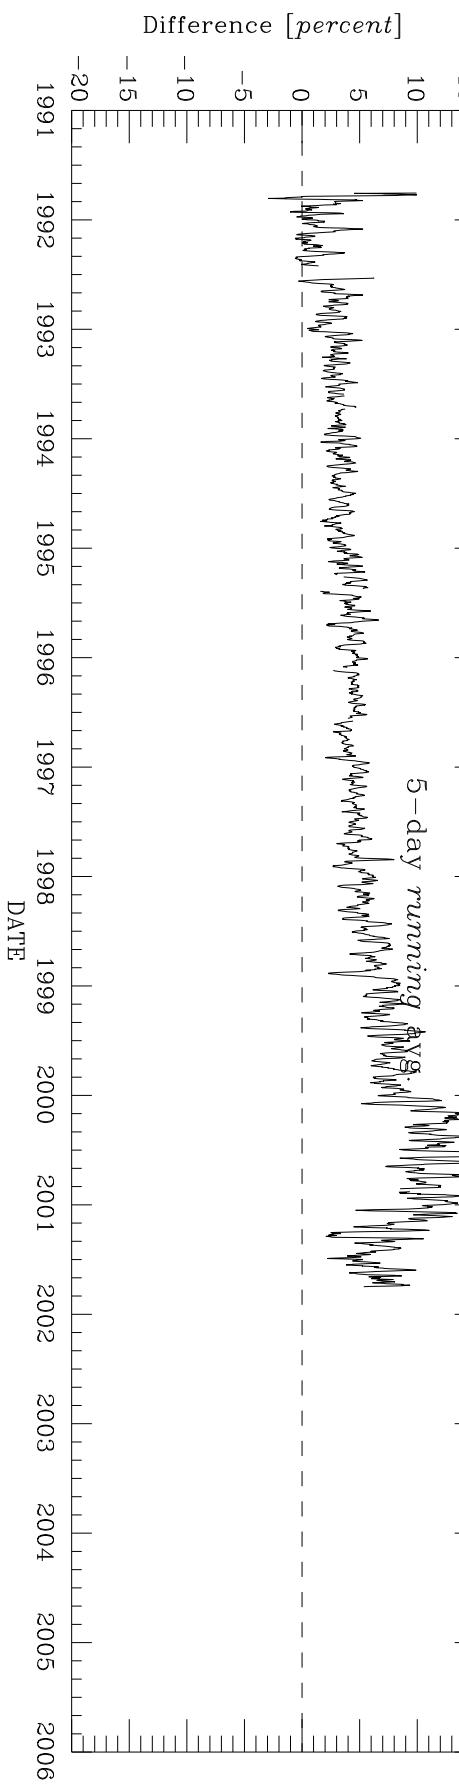

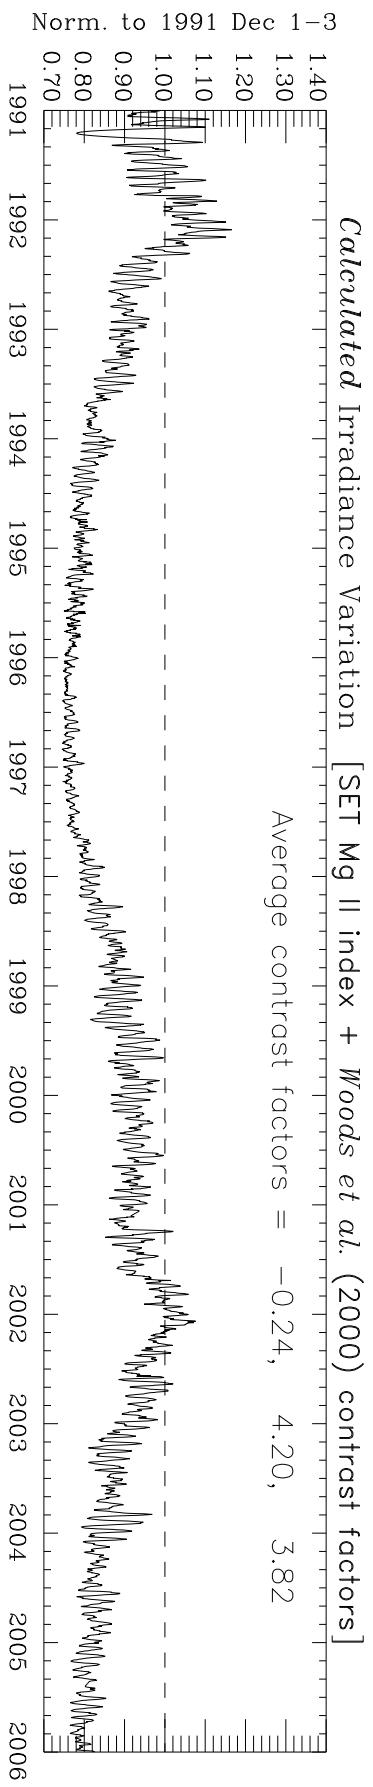

Solar Irradiance Comparison: 130–134 nm

UARS SOLSTICE *V18* Irradiance Data [0 samples screened in plot window]

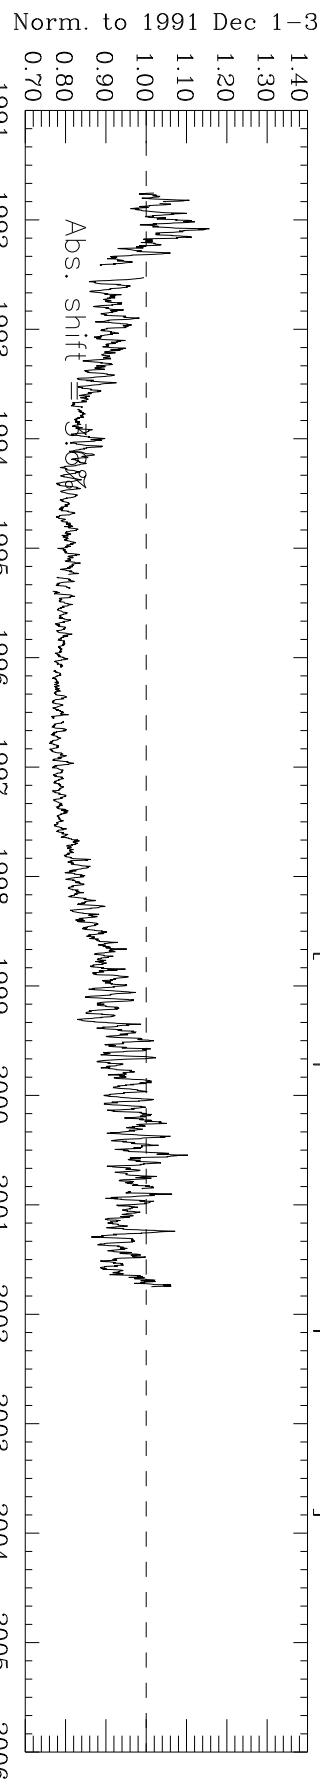

Average contrast factors = -0.24, 4.20, 3.82

Solar Irradiance Comparison: 135–139 nm

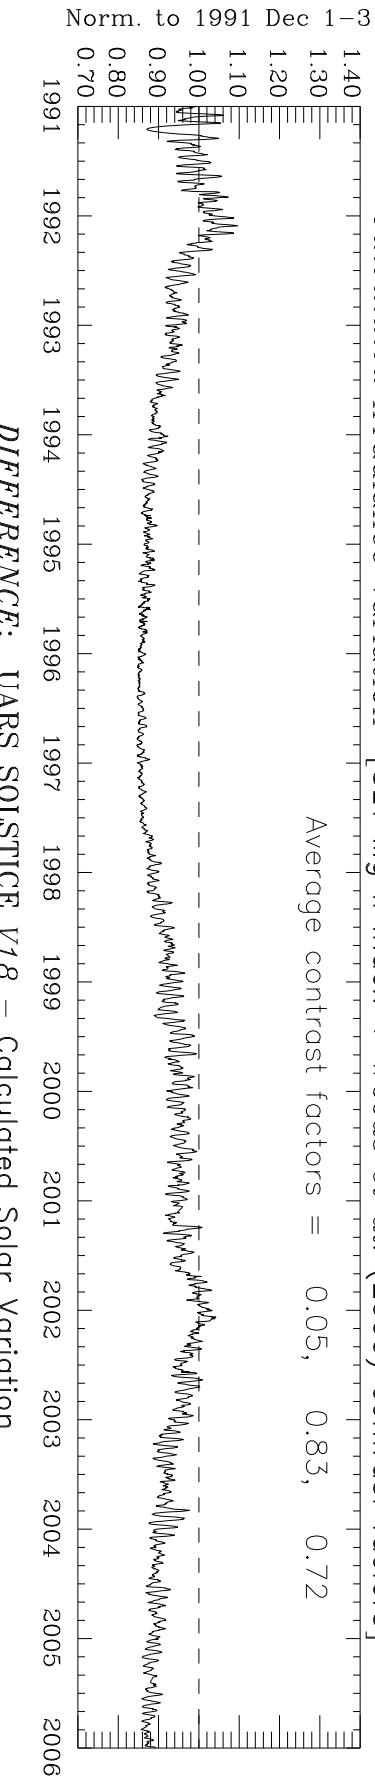

UARS SOLSTICE *V18* Irradiance Data [0 samples screened in plot window]

Norm. to 1991 Dec 1-3
Abs. Shift

Average contrast factors = 0.05, 0.83, 0.72

Average contrast factors = 0.18, 1.78, 1.36

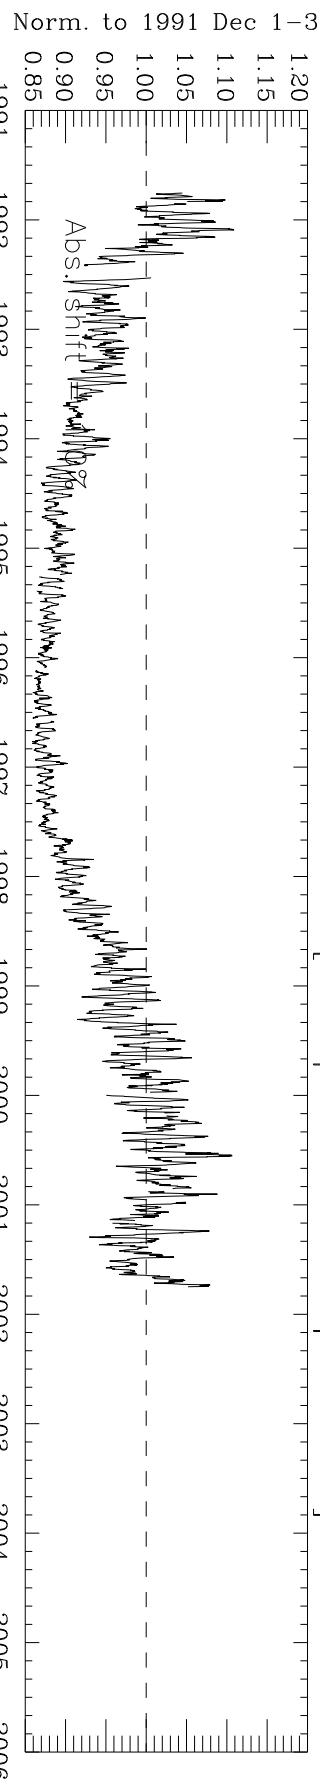

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

Solar Irradiance Comparison: 150–154 nm

UARS SOLSTICE V18 Irradiance Data [0 samples screened in plot window]

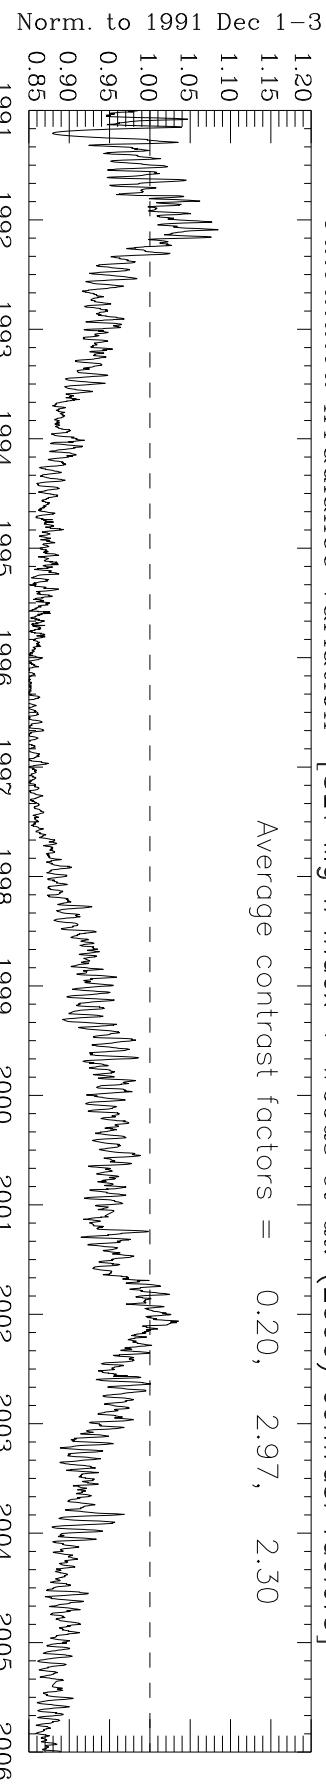

Norm.

to 1991 Dec 1–3

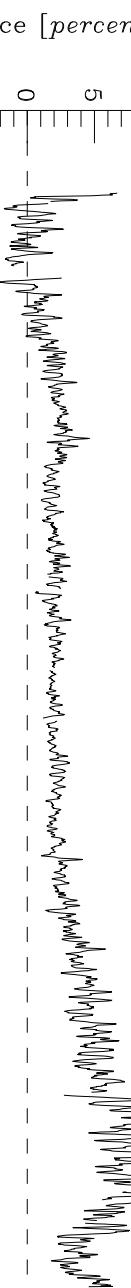

Calculated Irradiance Variation [SET Mg II index + Woods *et al.* (2000) contrast factors]

Average contrast factors = 0.20, 2.97, 2.30

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

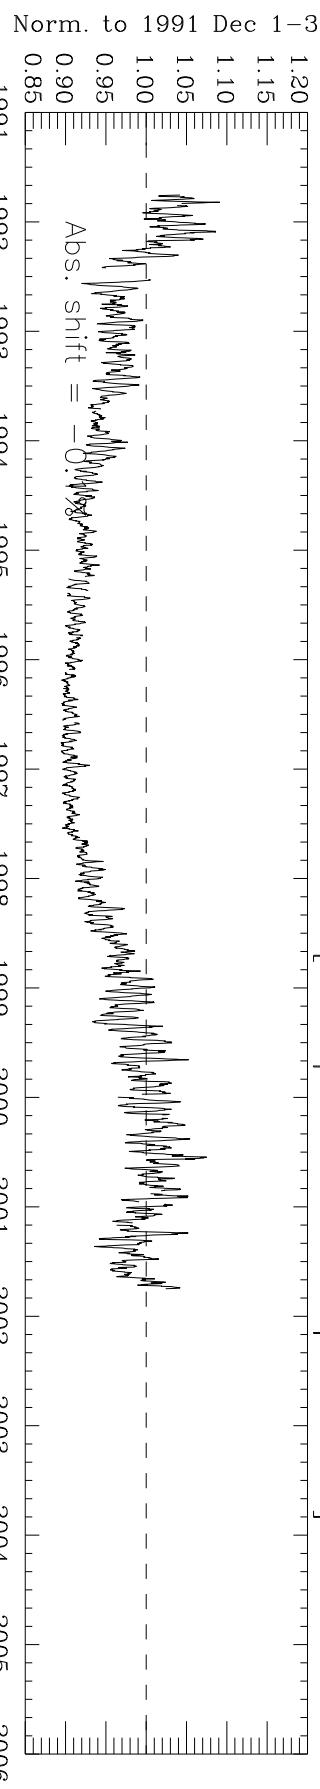

Difference [percent]

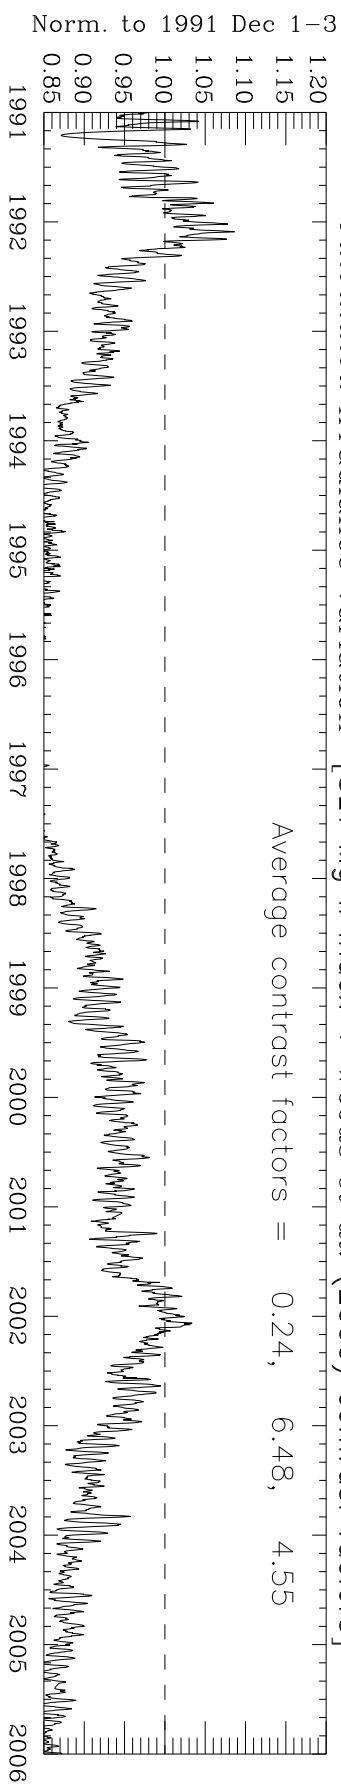

Solar Irradiance Comparison: 155–159 nm

UARS SOLSTICE *V18* Irradiance Data [0 samples screened in plot window]

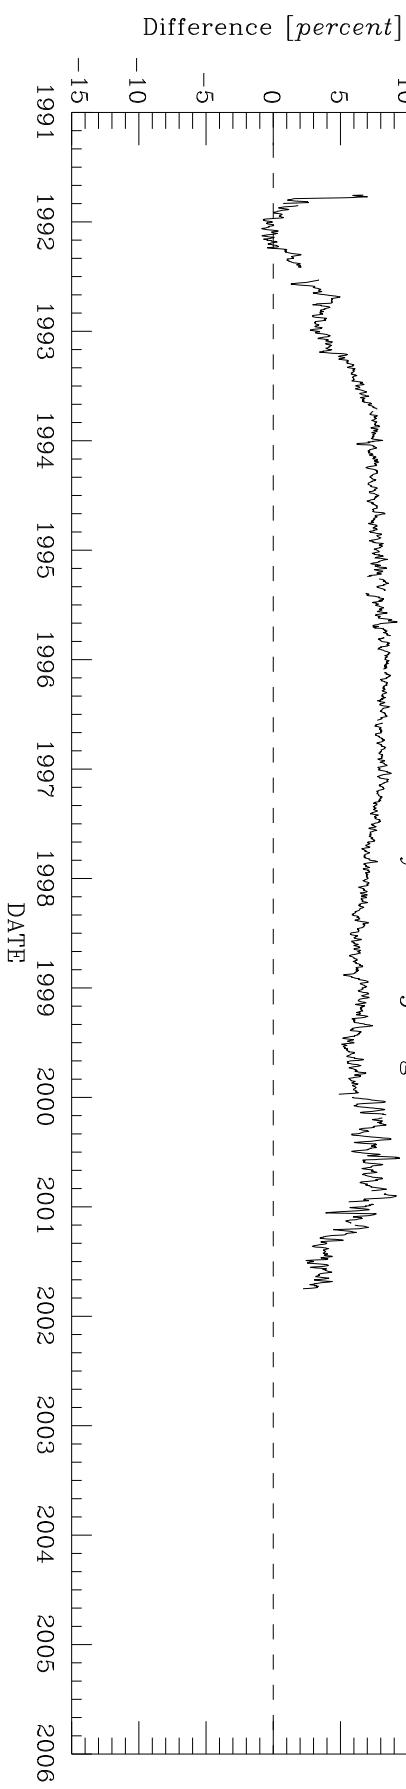

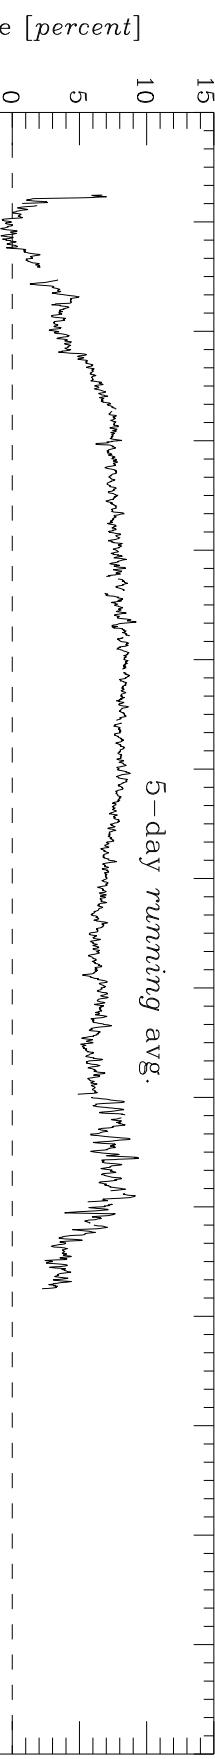

Calculated Irradiance Variation [SET Mg II index + Woods *et al.* (2000) contrast factors]

Average contrast factors = 0.24, 6.48, 4.55

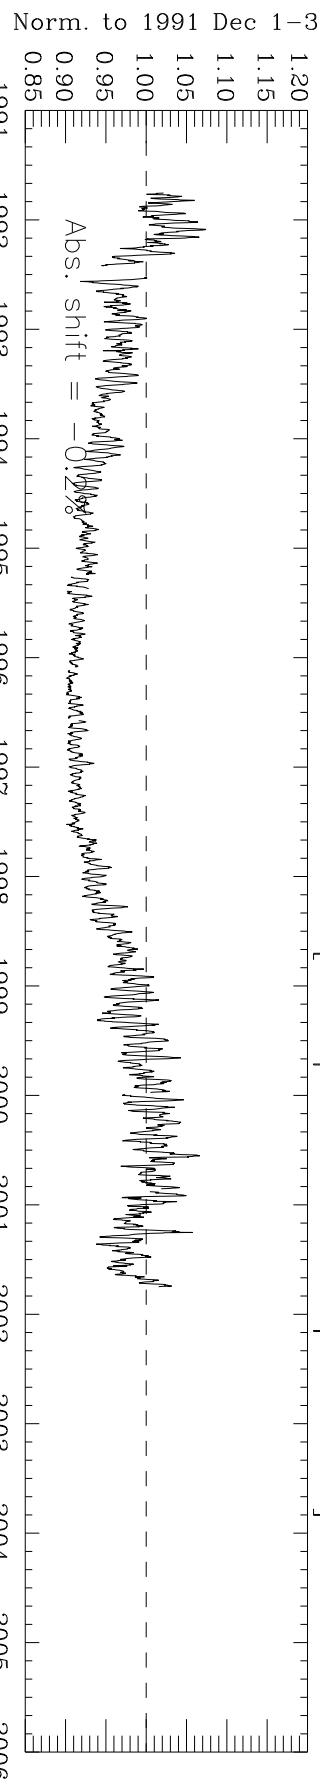

DIFFERENCE: UARS SOLSTICE *V18* – Calculated Solar Variation

5-day running avg.

Solar Irradiance Comparison: 160–164 nm

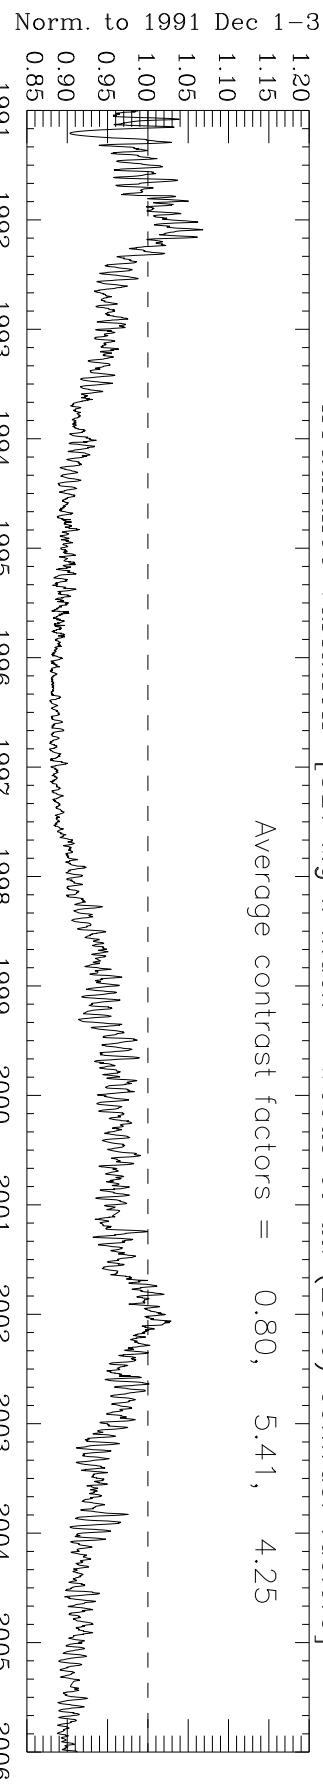

UARS SOLSTICE V18 Irradiance Data [0 samples screened in plot window]

1-3

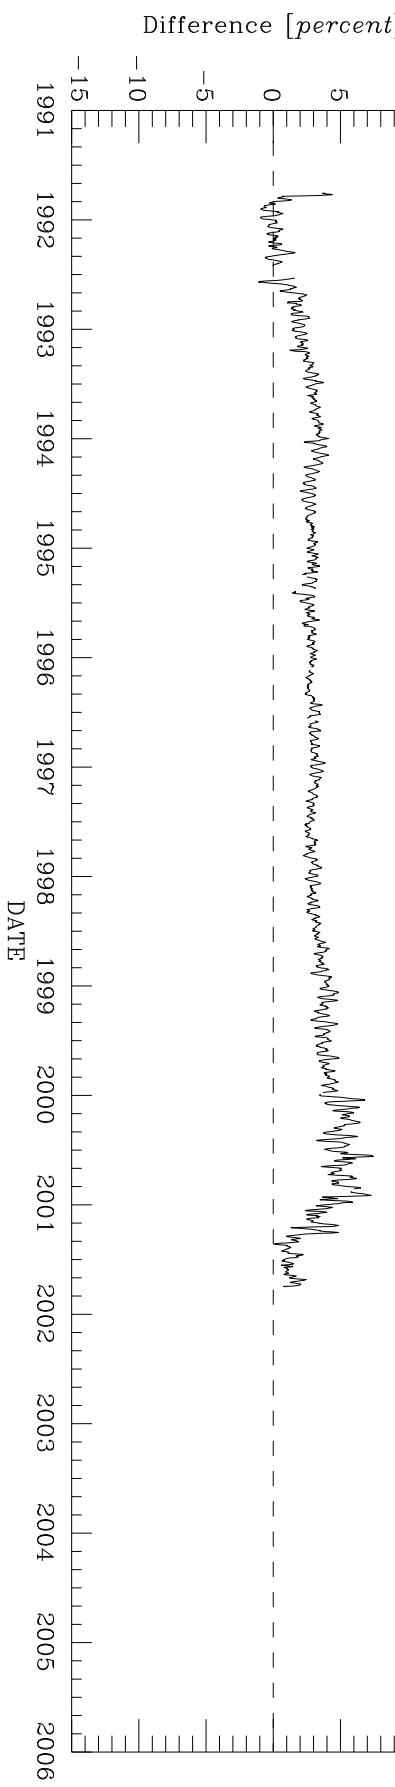

Calculated Irradiance Variation [SET Mg II index + Woods et al. (2000) contrast factors]

Average contrast factors = 0.80, 5.41, 4.25

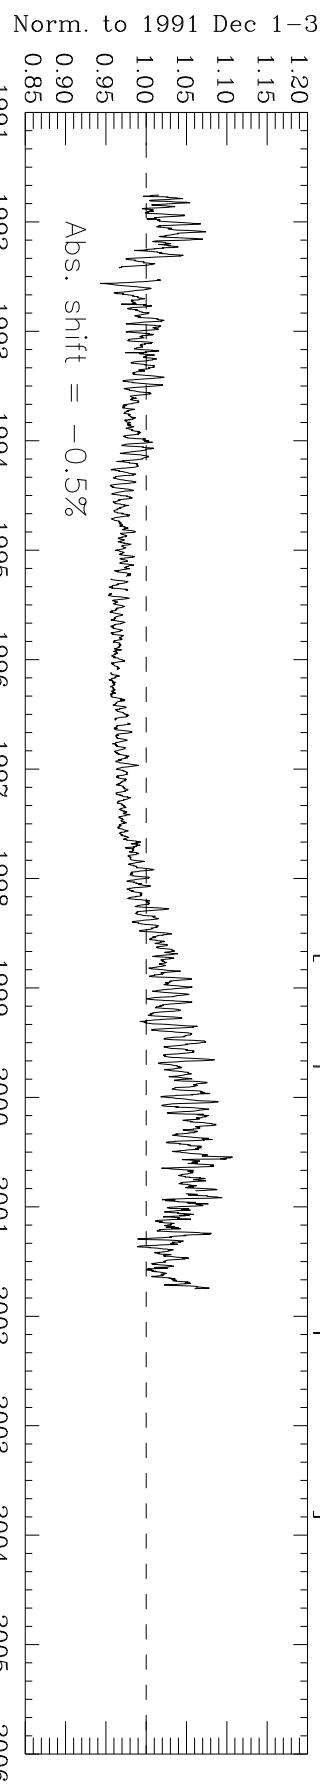

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

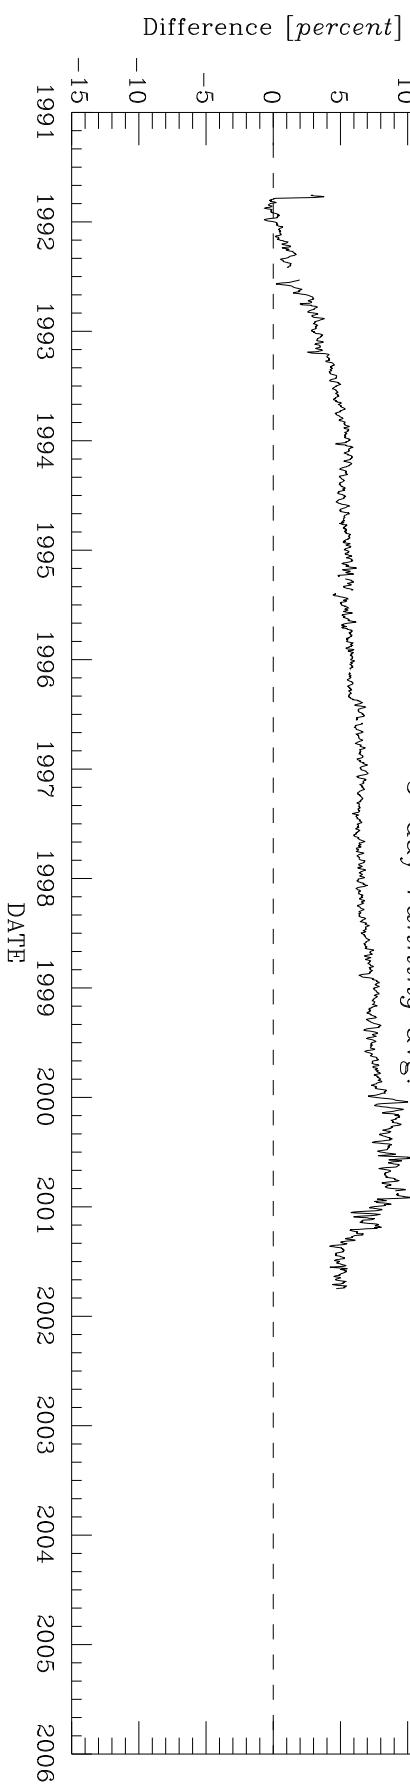

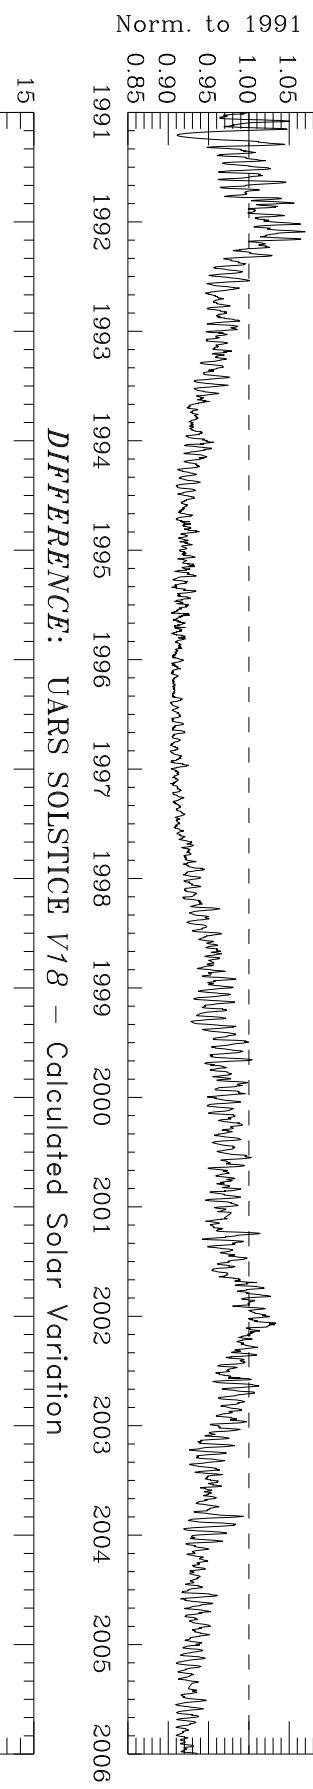

Solar Irradiance Comparison: 165–169 nm

UARS SOLSTICE *V18* Irradiance Data [0 samples screened in plot window]

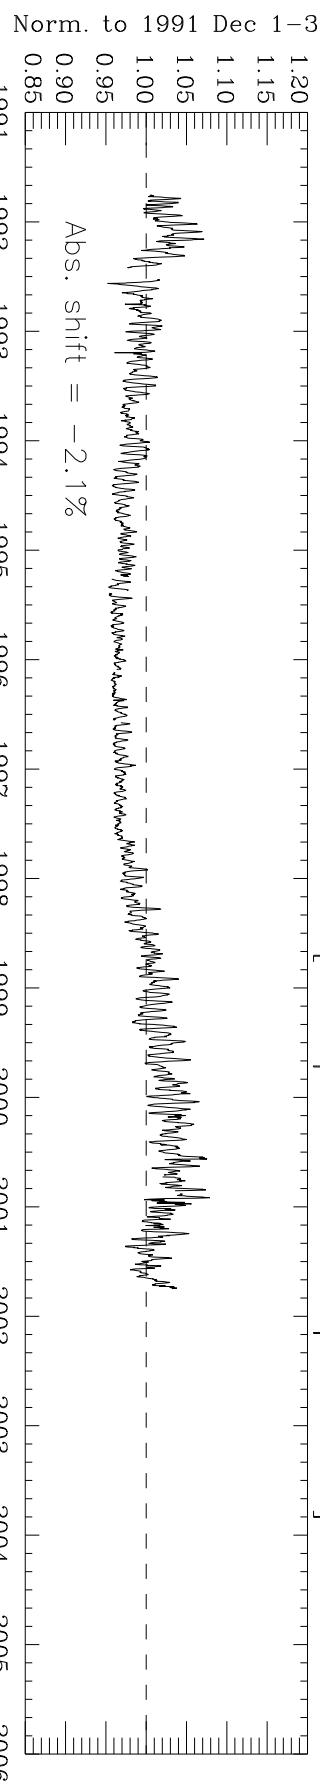

Average contrast factors = 1.83, 7.99, 7.96

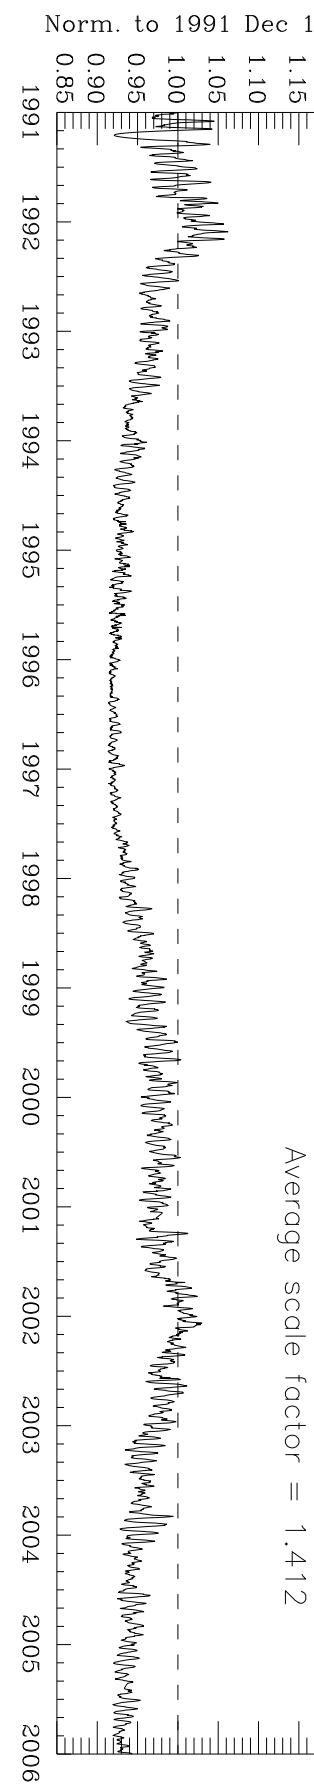

Solar Irradiance Comparison: 170–174 nm

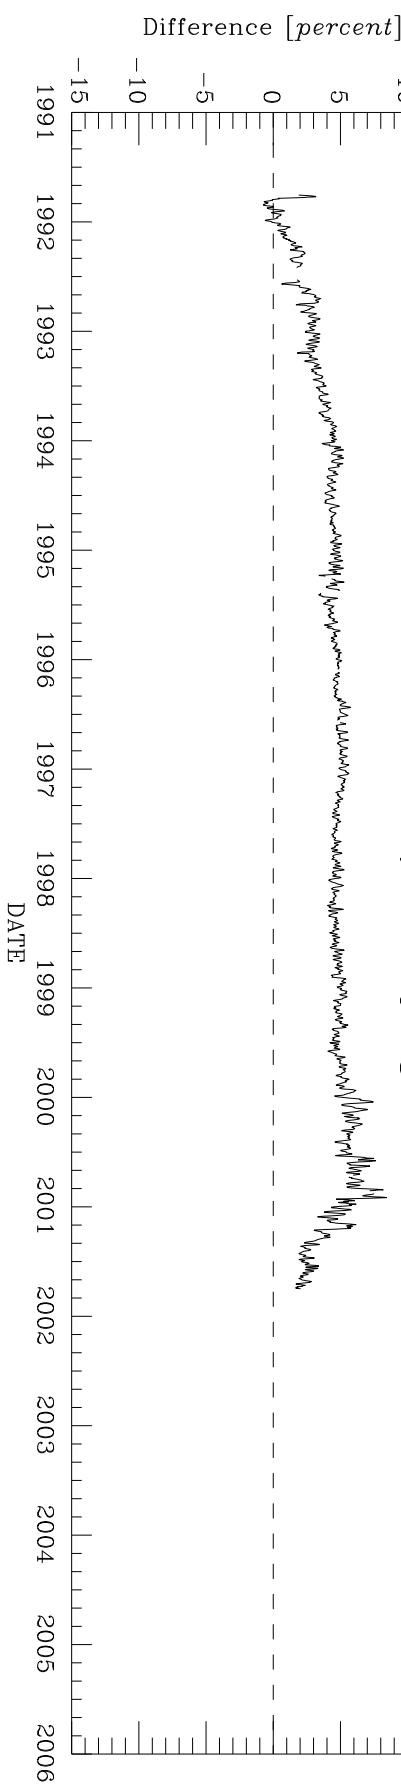

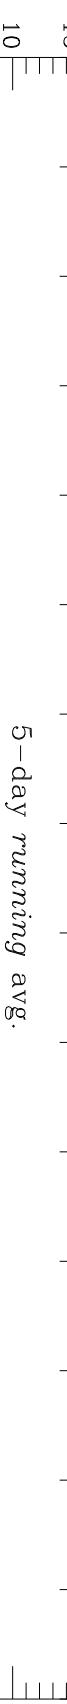

UARS SOLSTICE *V18* Irradiance Data [0 samples screened in plot window]

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

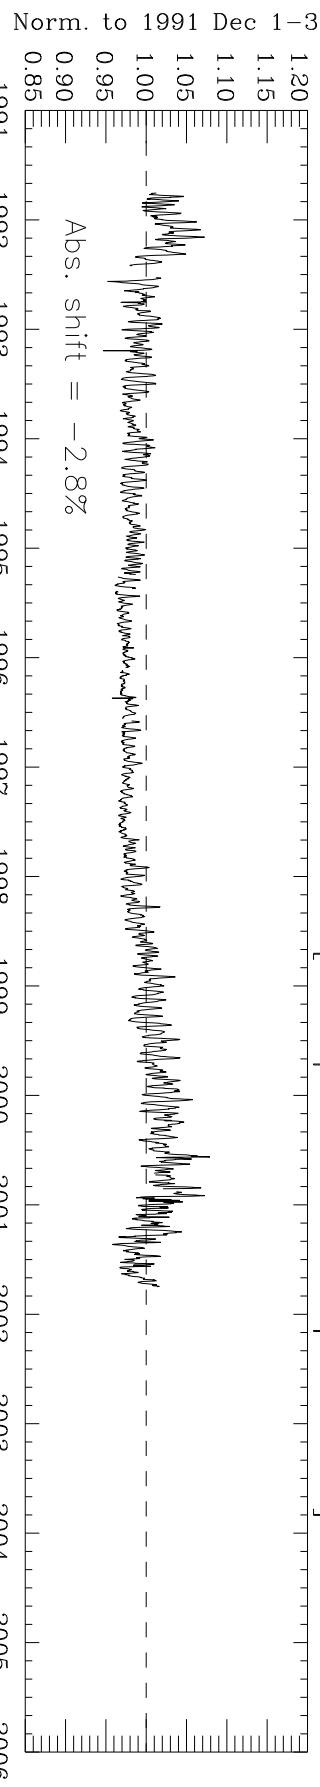

*DIFFERENCE: UARS SOLSTICE *V18* – Calculated Solar Variation*

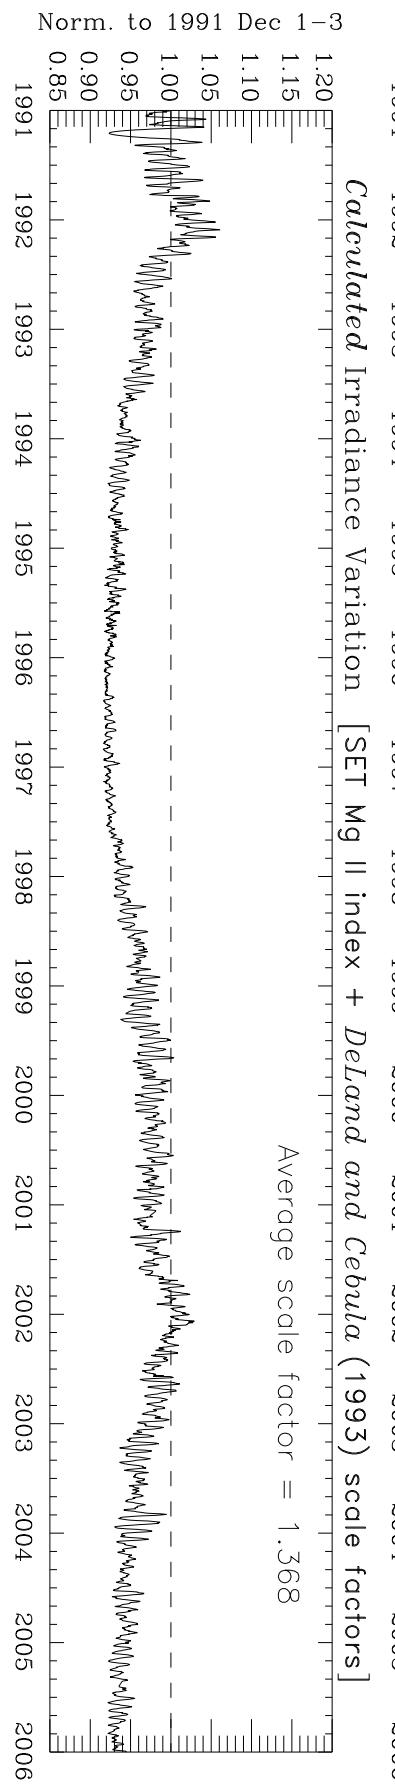

Solar Irradiance Comparison: 175–179 nm

UARS SOLSTICE *V18* Irradiance Data [0 samples screened in plot window]

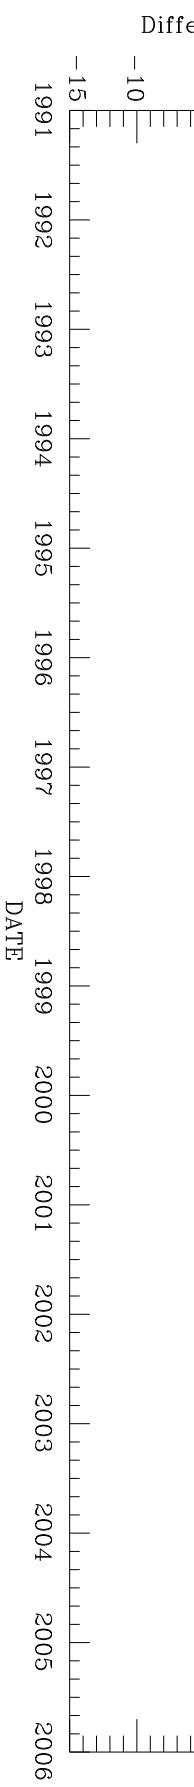

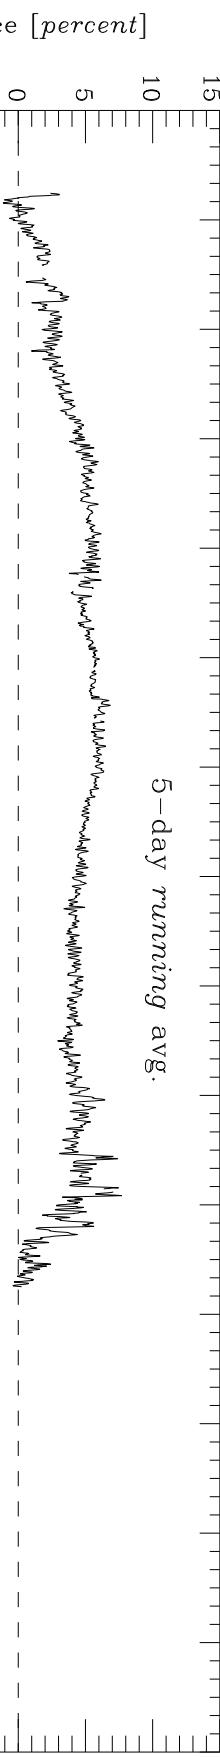

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

Average scale factor = 1.368

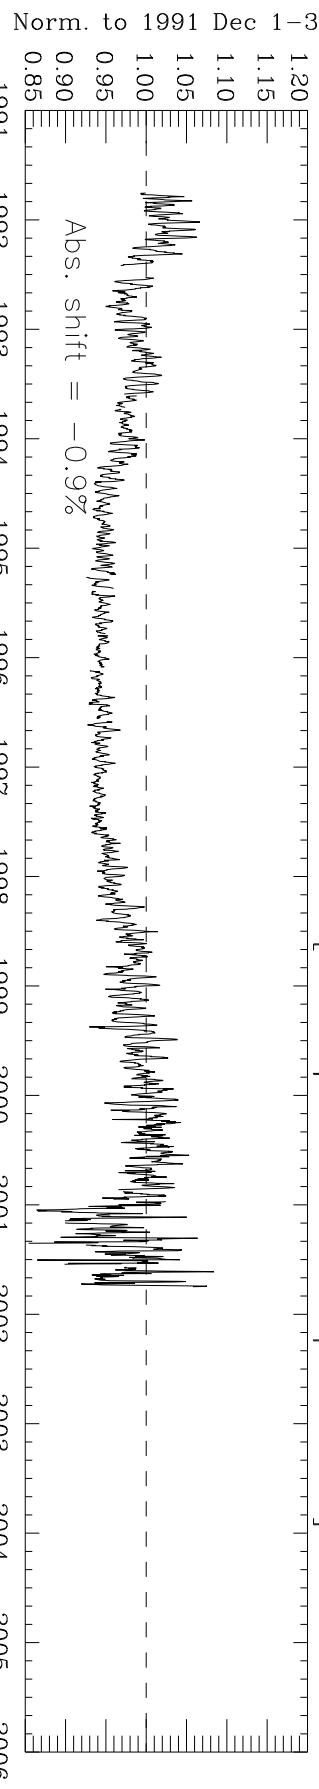

DIFFERENCE: UARS SOLSTICE *V18* – Calculated Solar Variation

5-day running avg.

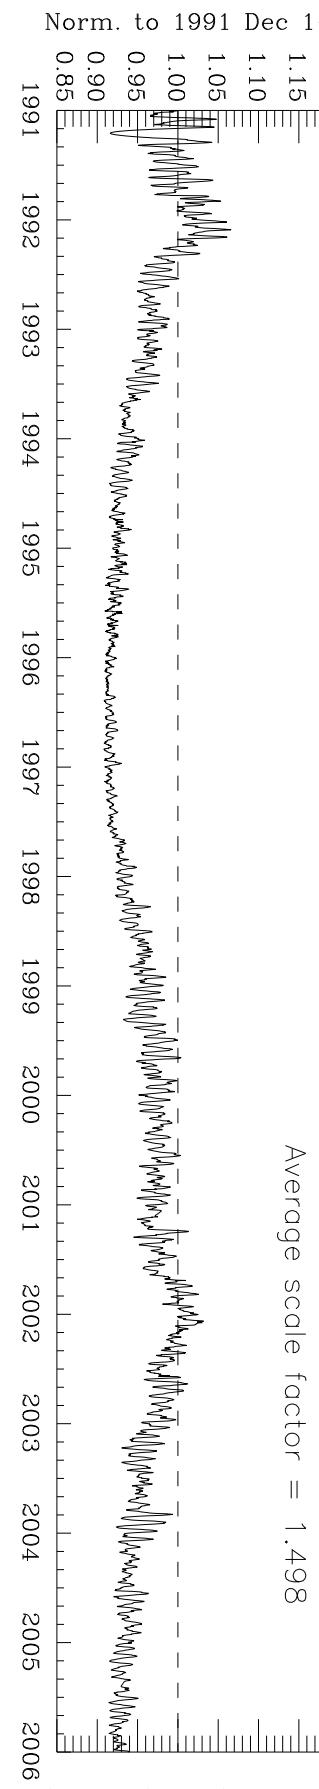

Solar Irradiance Comparison: 180–184 nm

UARS SOLSTICE V18 Irradiance Data [19 samples screened in plot window]

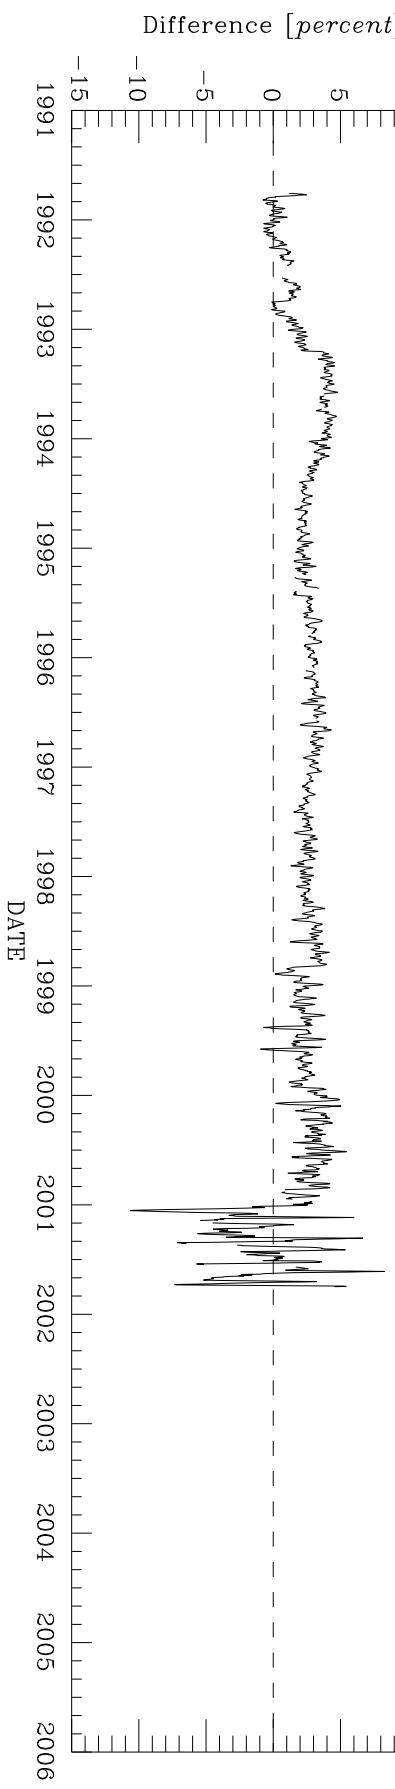

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

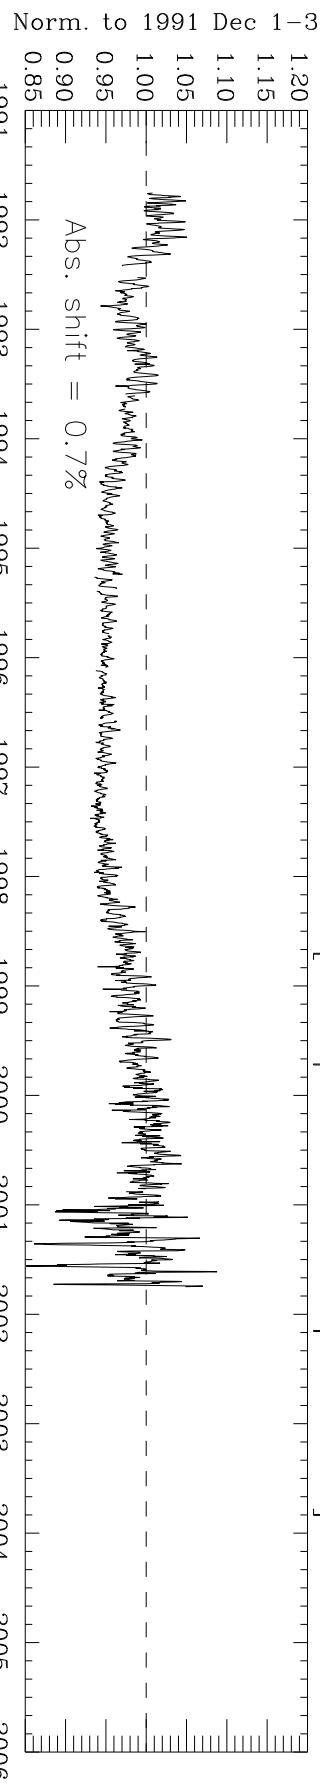

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

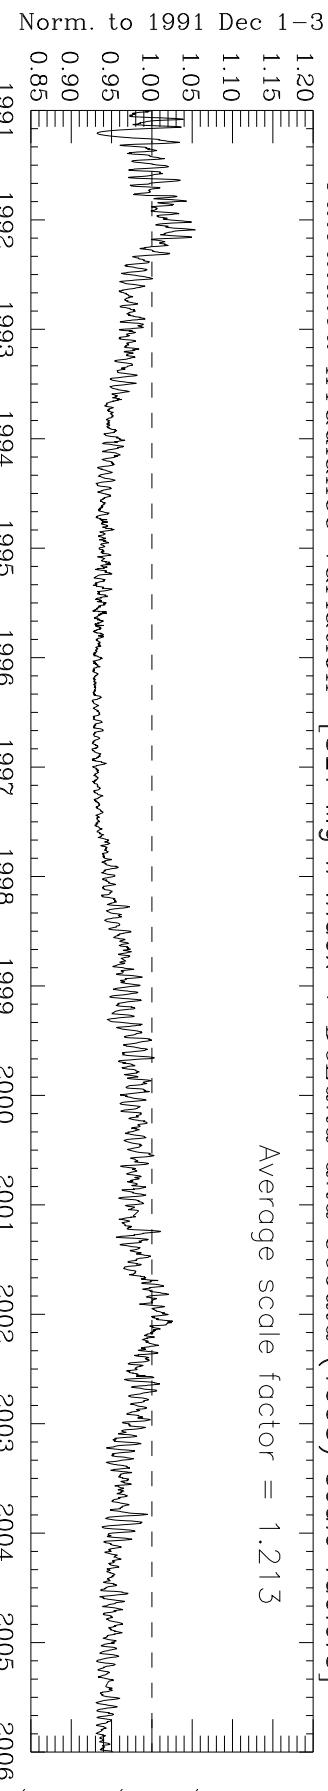

Solar Irradiance Comparison: 185–189 nm

UARS SOLSTICE V18 Irradiance Data [1 samples screened in plot window]

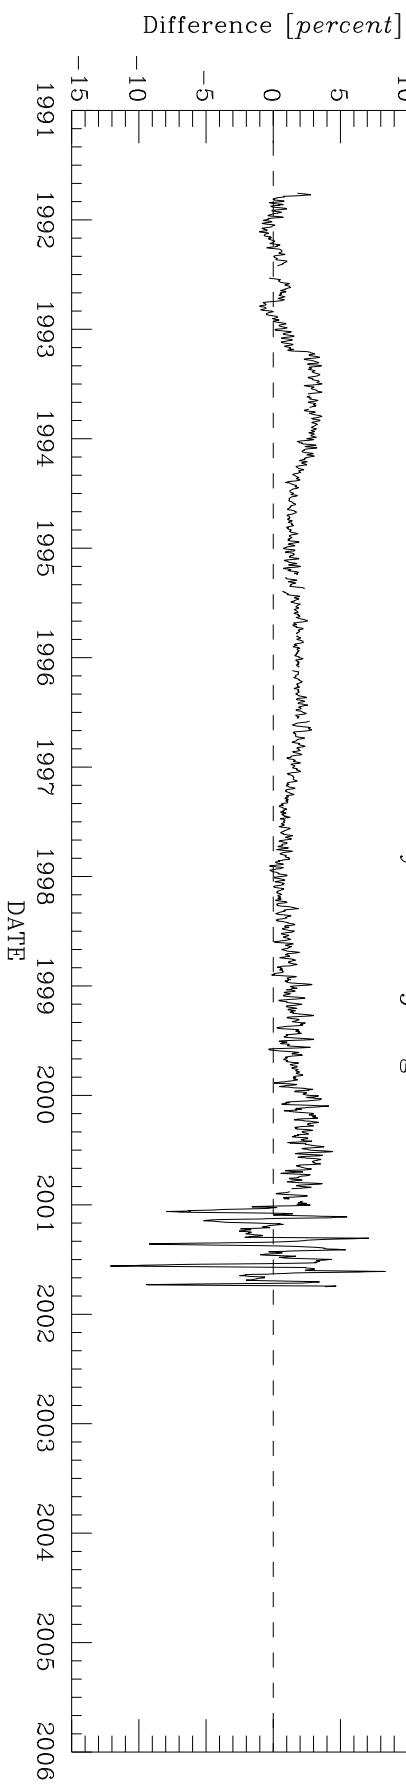

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

Average scale factor = 1.213

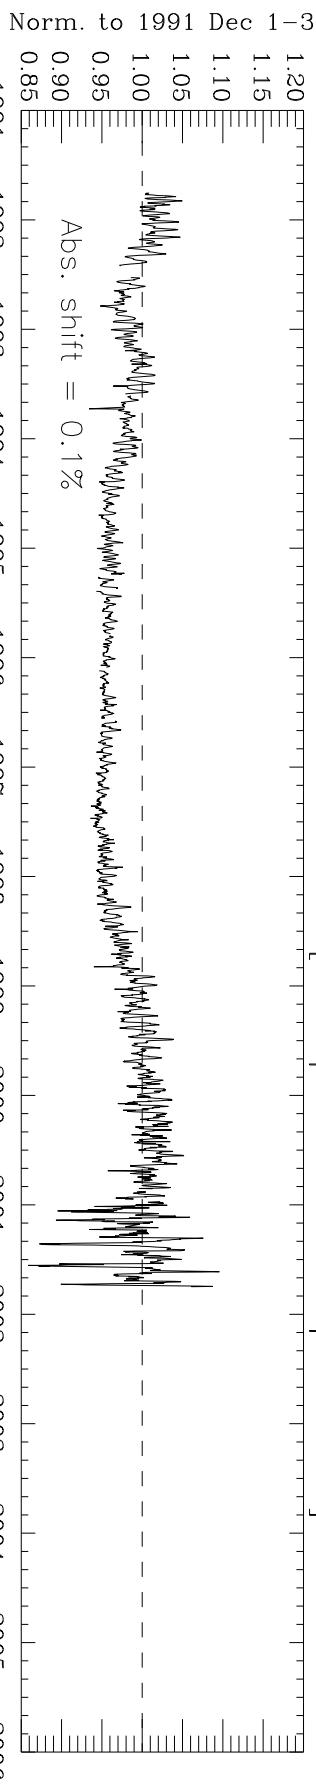

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

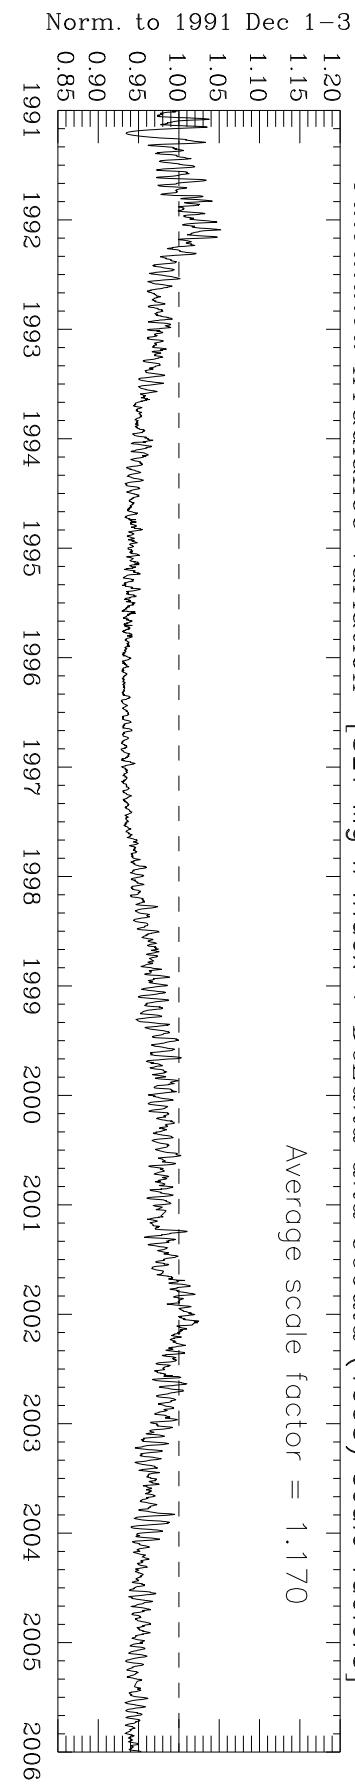

Solar Irradiance Comparison: 190–194 nm

UARS SOLSTICE V18 Irradiance Data [0 samples screened in plot window]

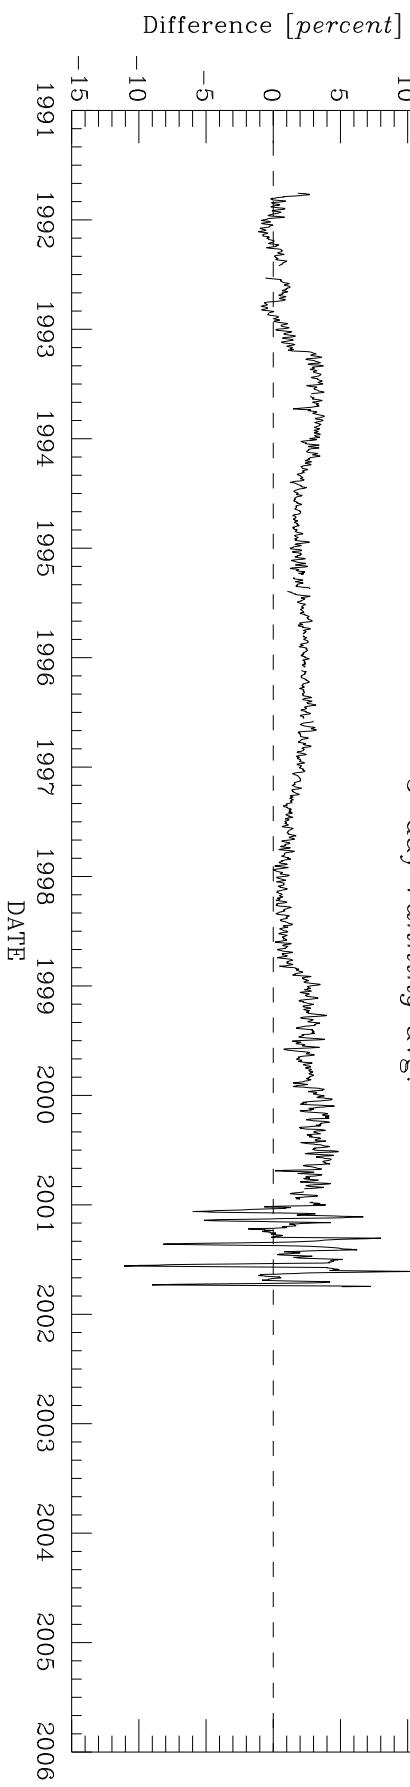

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

Average scale factor = 1.170

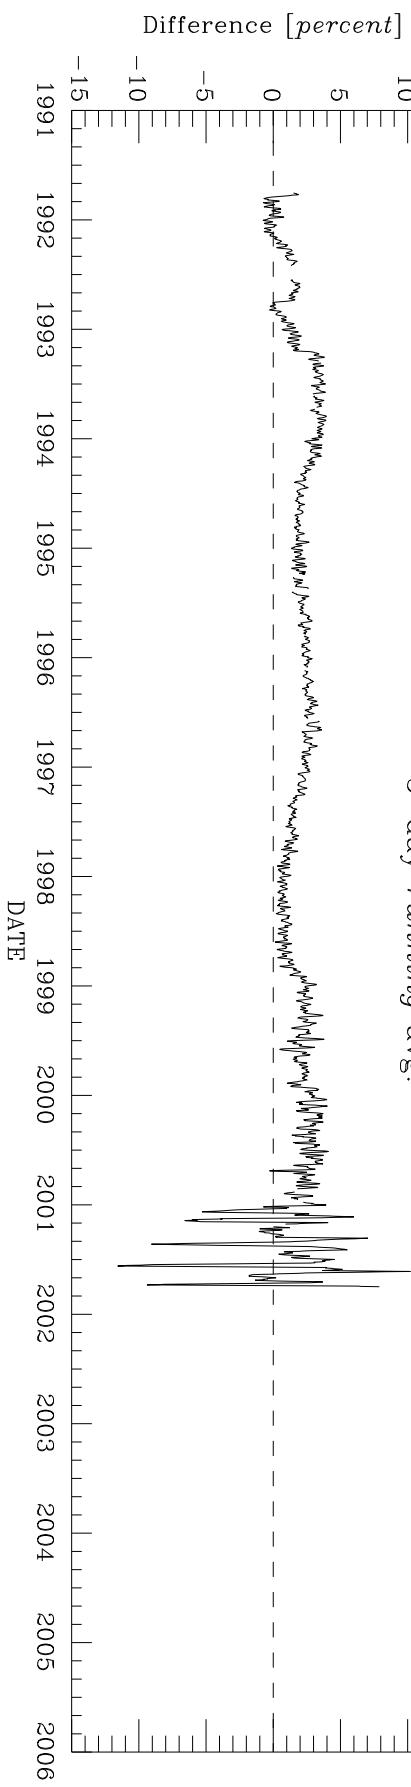

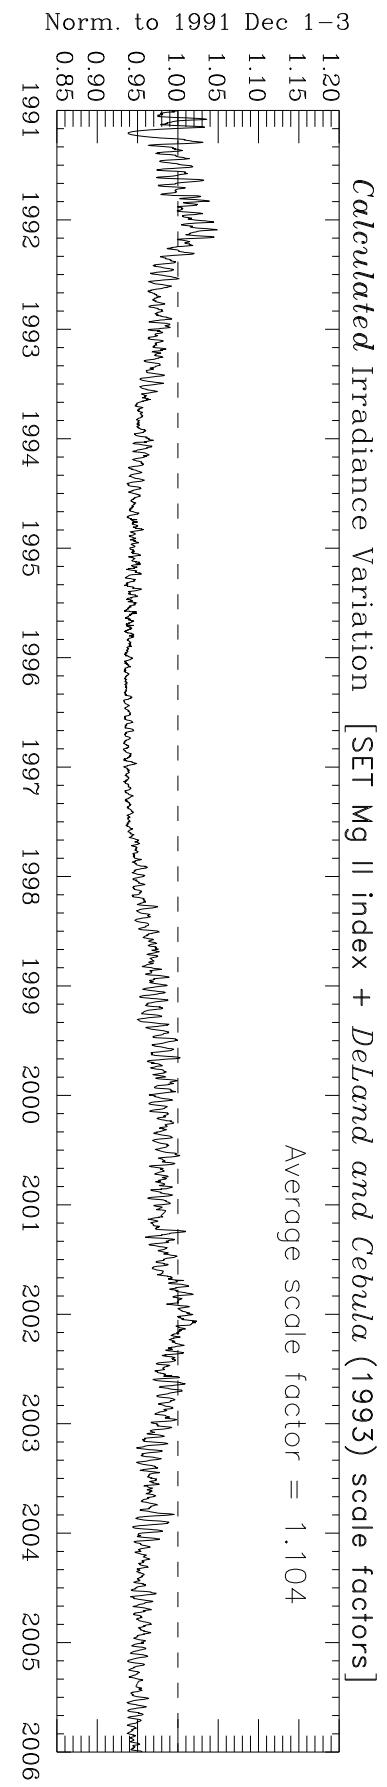

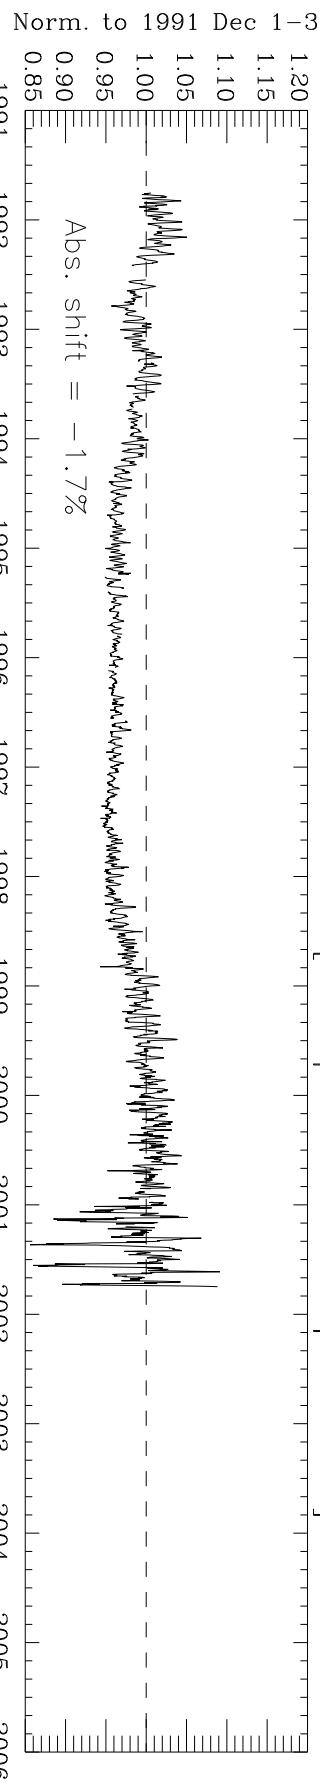

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

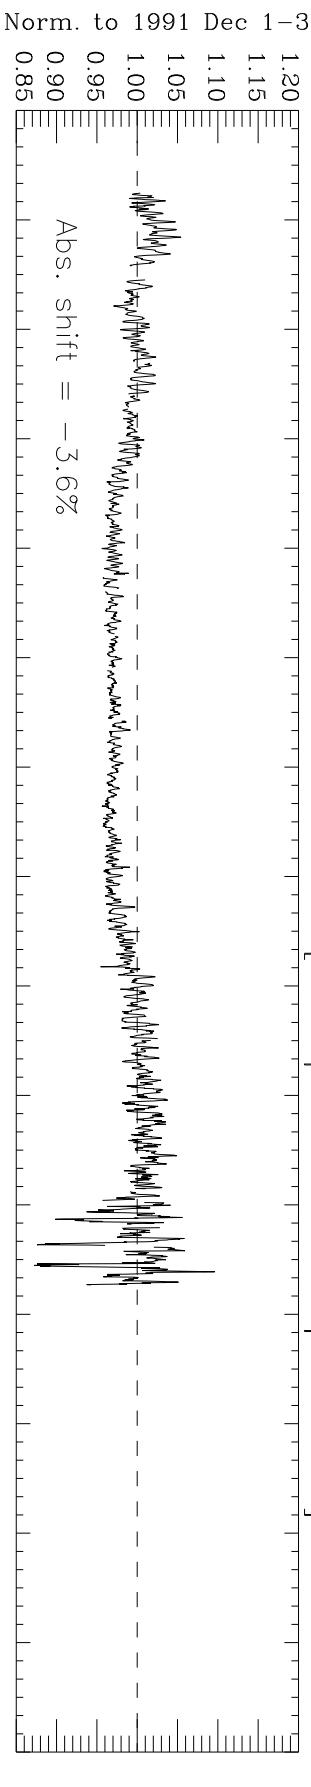

Solar Irradiance Comparison: 195–199 nm

UARS SOLSTICE V18 Irradiance Data [0 samples screened in plot window]

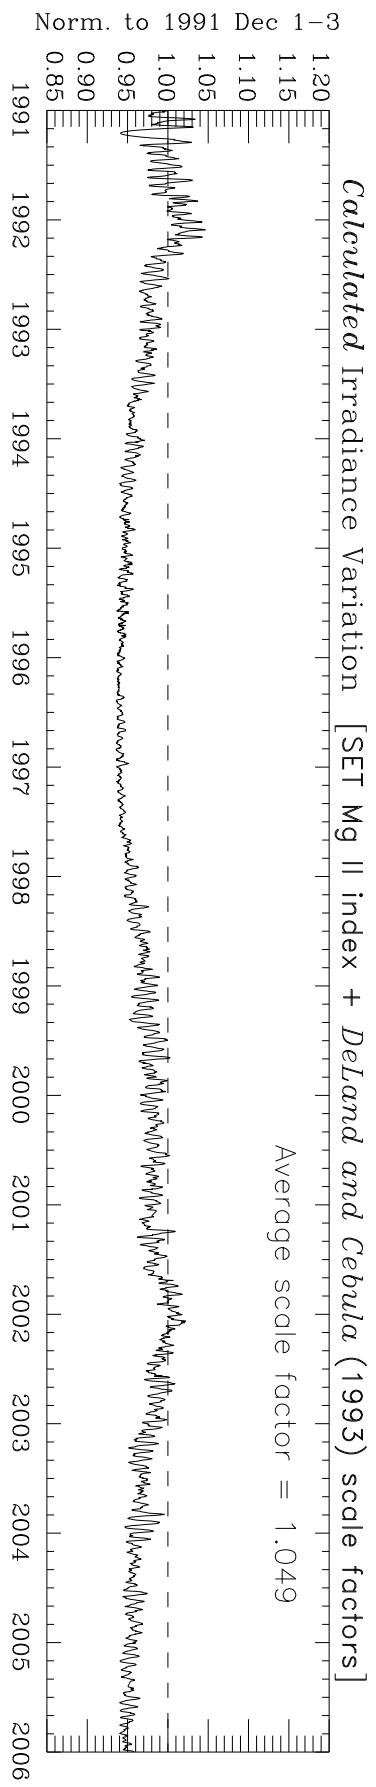

Solar Irradiance Comparison: 200–207 nm

UARS SOLSTICE *V18* Irradiance Data [0 samples screened in plot window]

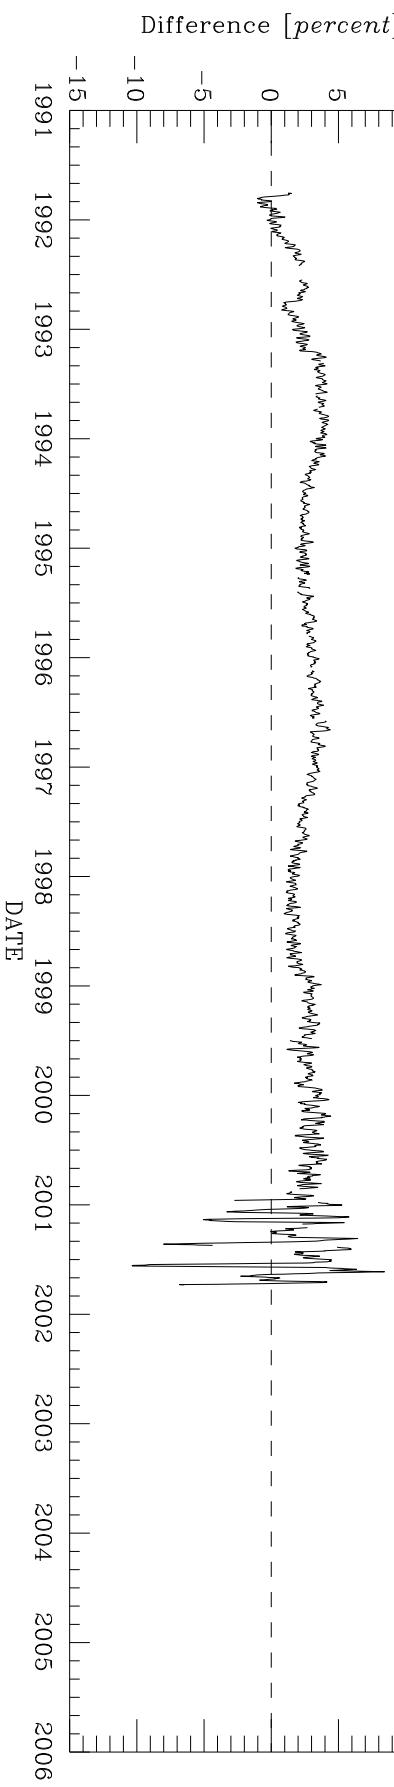

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

Average scale factor = 1.049

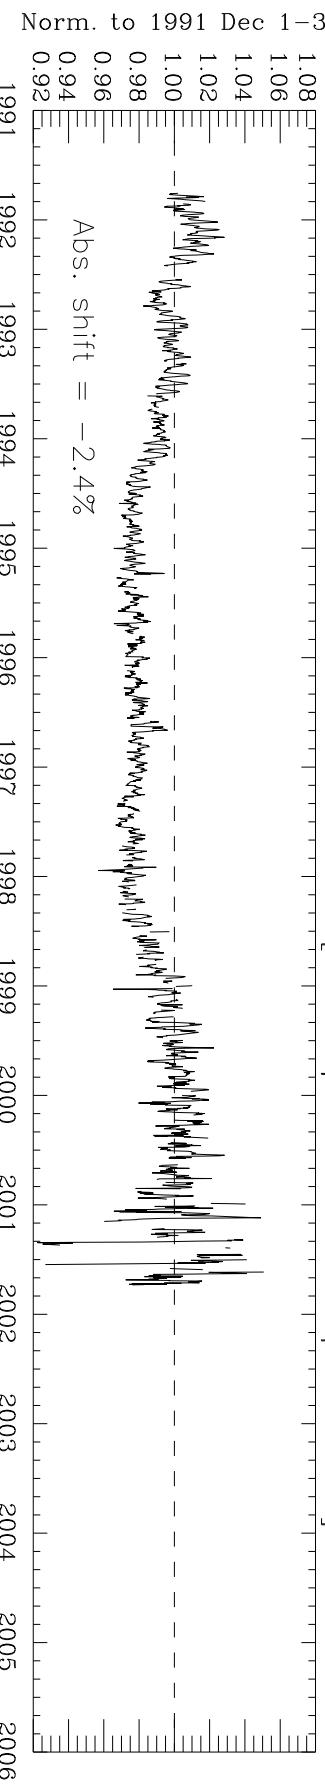

DIFFERENCE: UARS SOLSTICE *V18* – Calculated Solar Variation

5-day running avg.

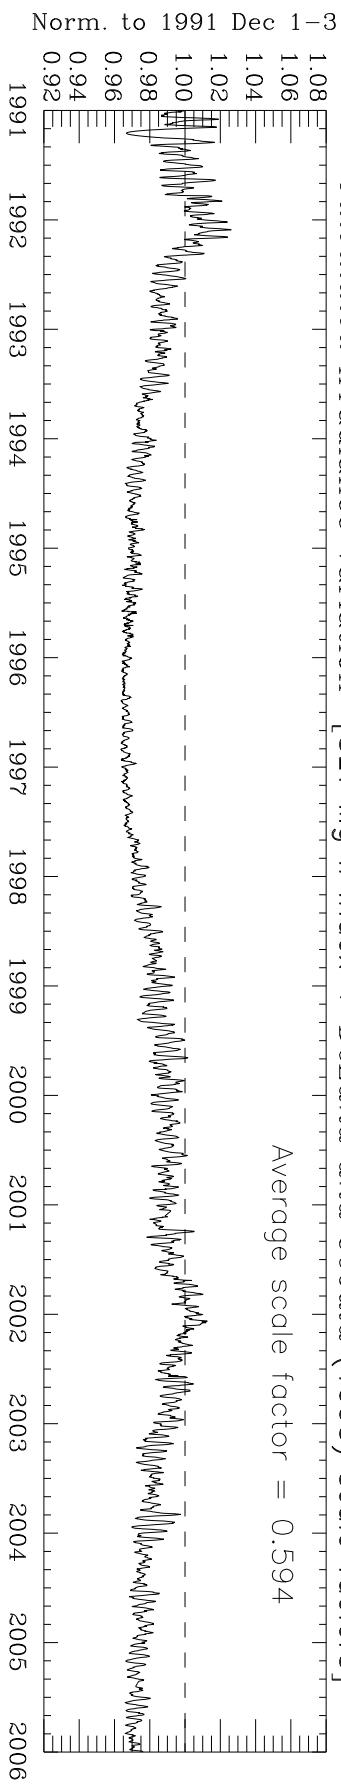

Solar Irradiance Comparison: 208–214 nm

UARS SOLSTICE V18 Irradiance Data [12 samples screened in plot window]

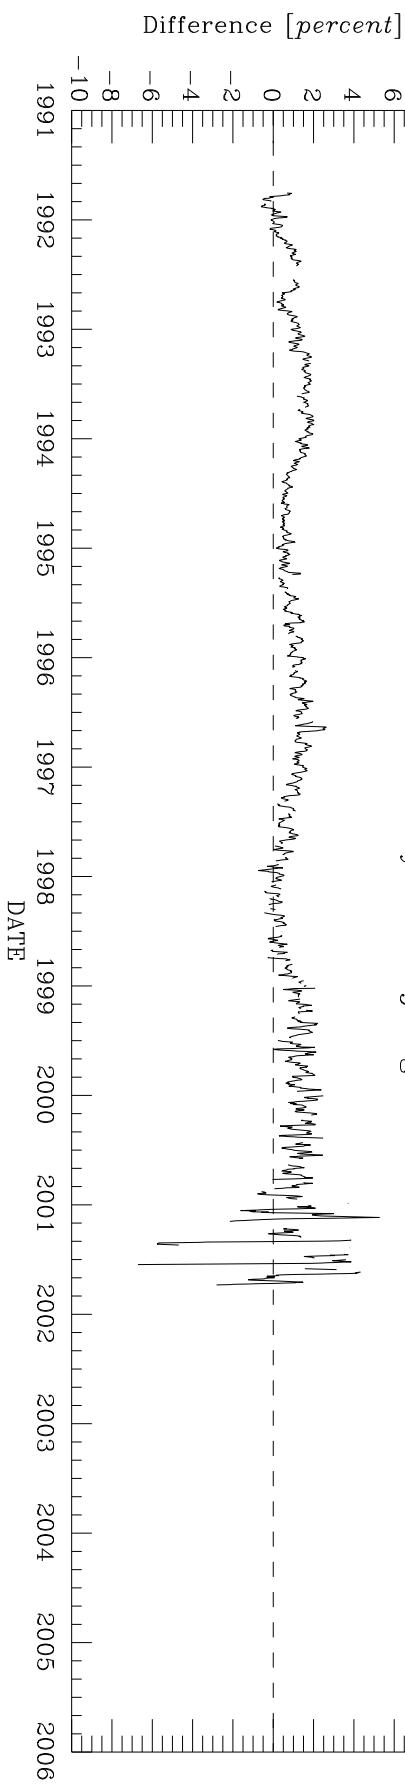

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

Average scale factor = 0.594

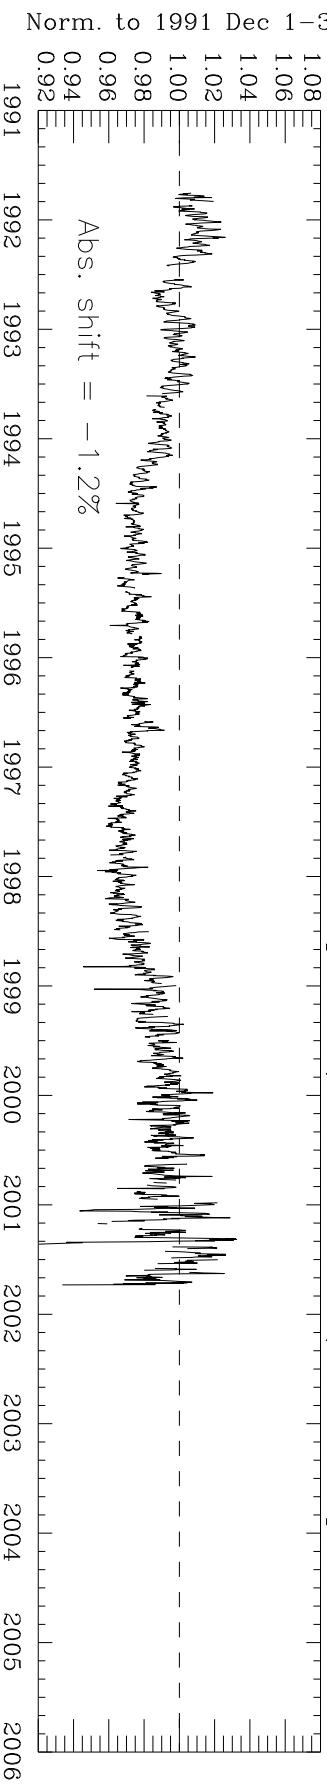

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

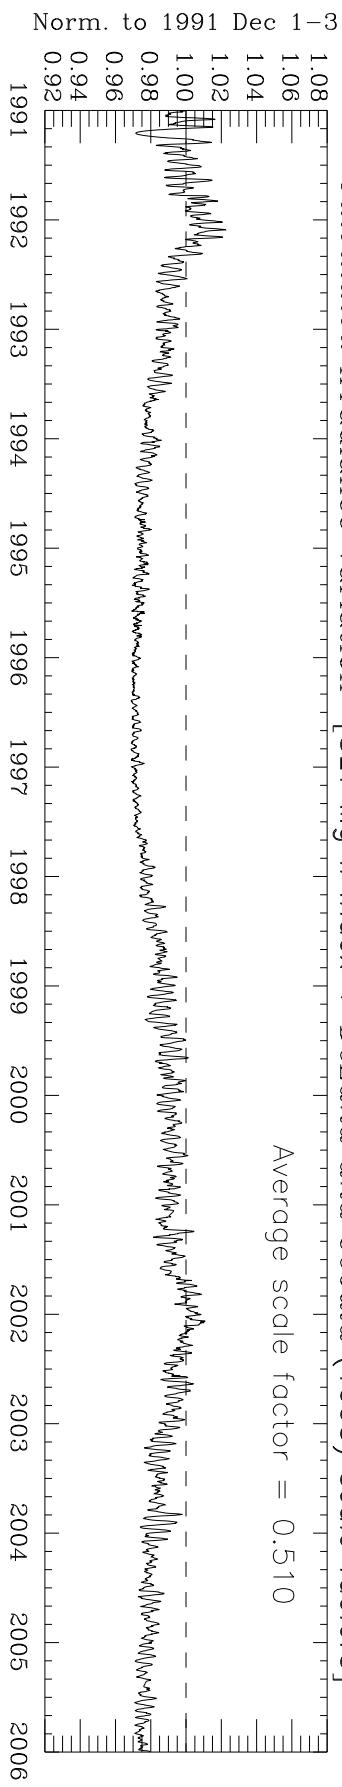

Solar Irradiance Comparison: 215–219 nm

UARS SOLSTICE V18 Irradiance Data [15 samples screened in plot window]

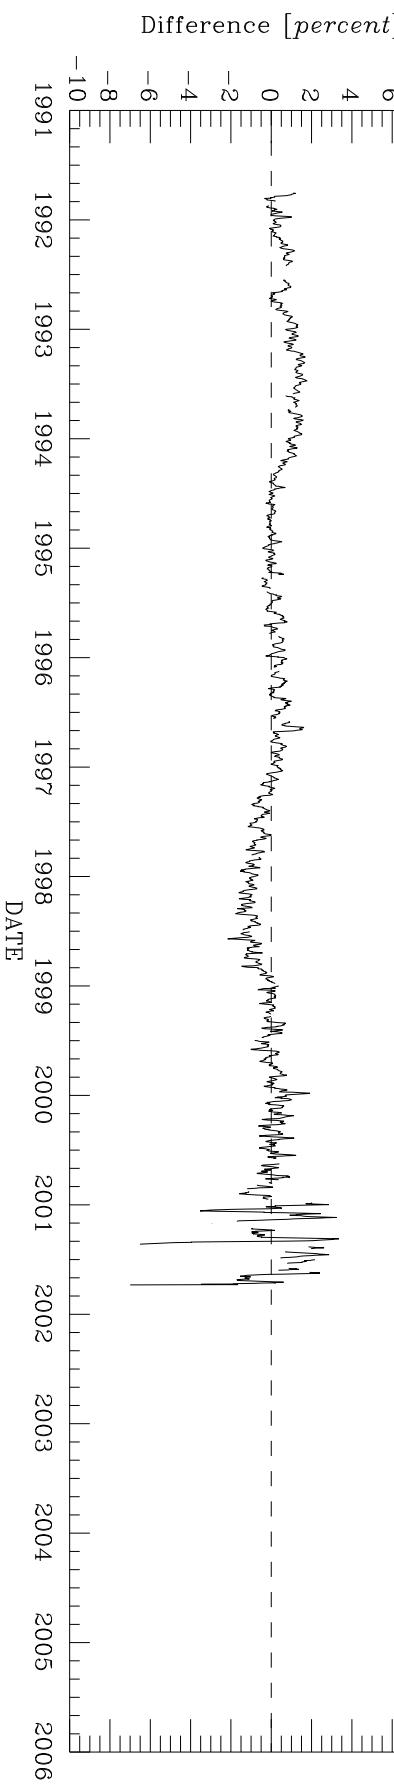

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

Average scale factor = 0.510

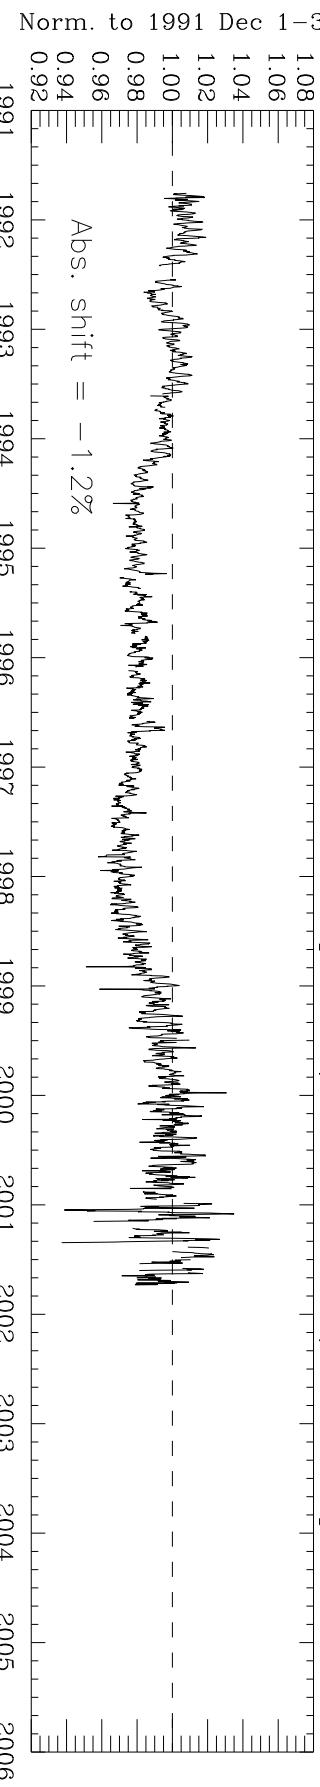

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

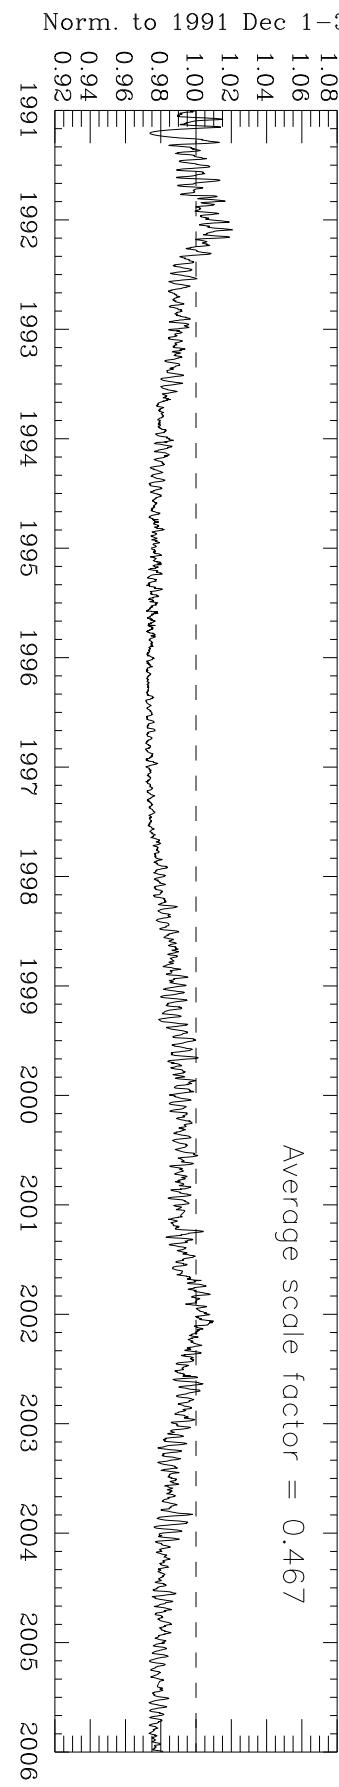

Solar Irradiance Comparison: 220–224 nm

UARS SOLSTICE V18 Irradiance Data [16 samples screened in plot window]

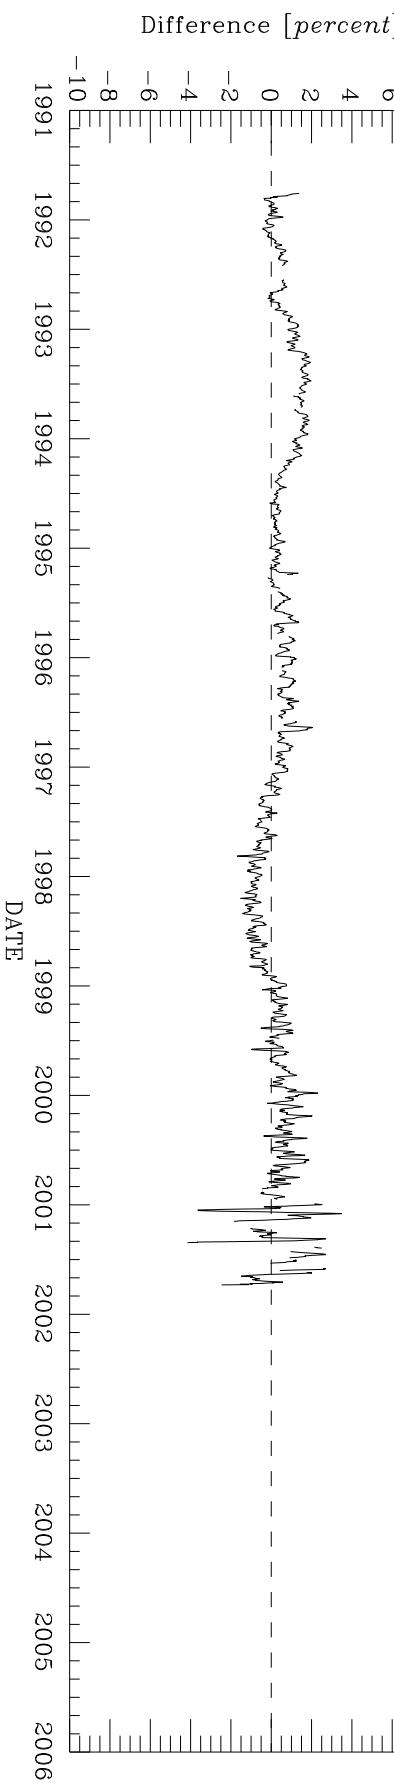

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

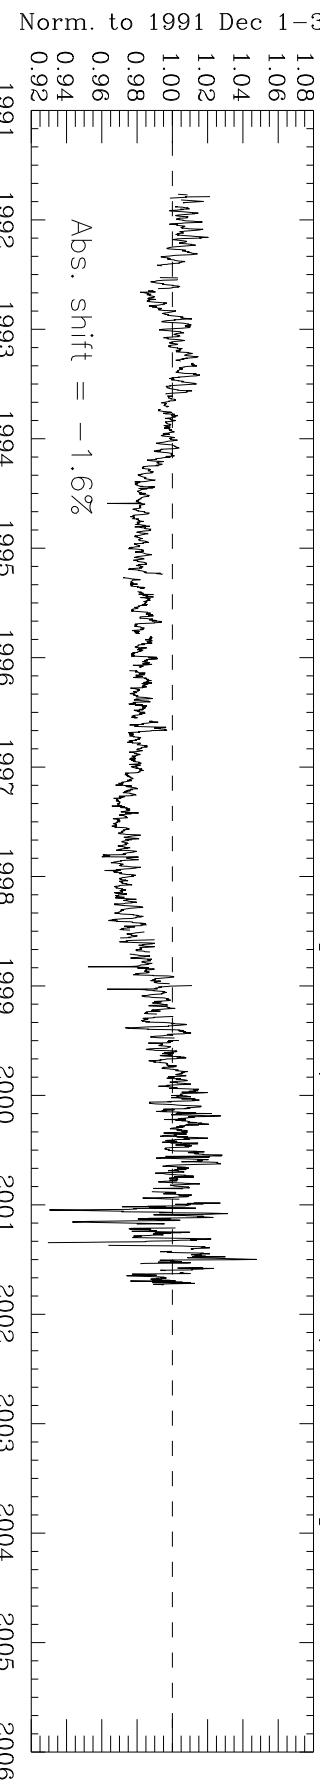

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

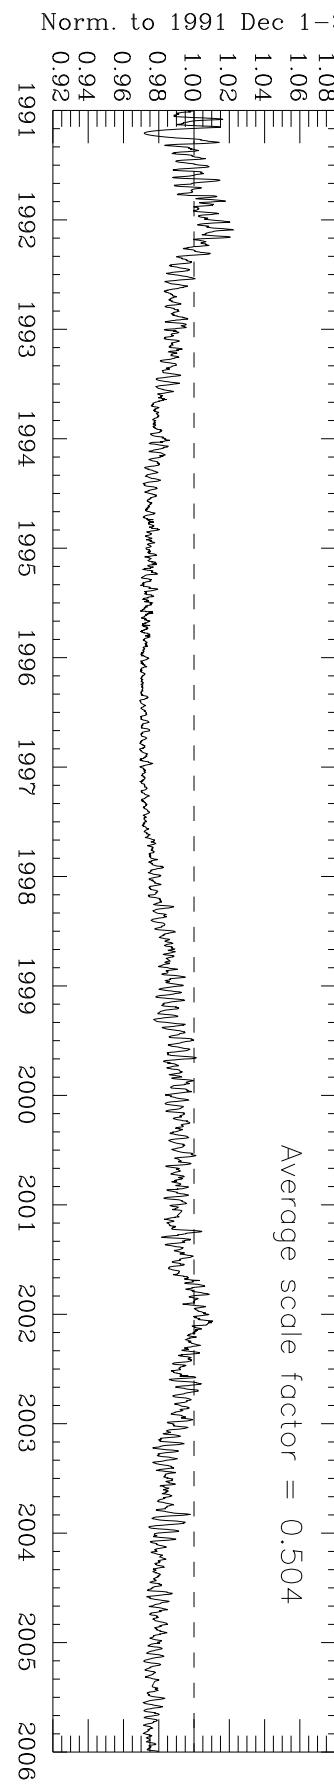

Solar Irradiance Comparison: 225–229 nm

UARS SOLSTICE V18 Irradiance Data [16 samples screened in plot window]

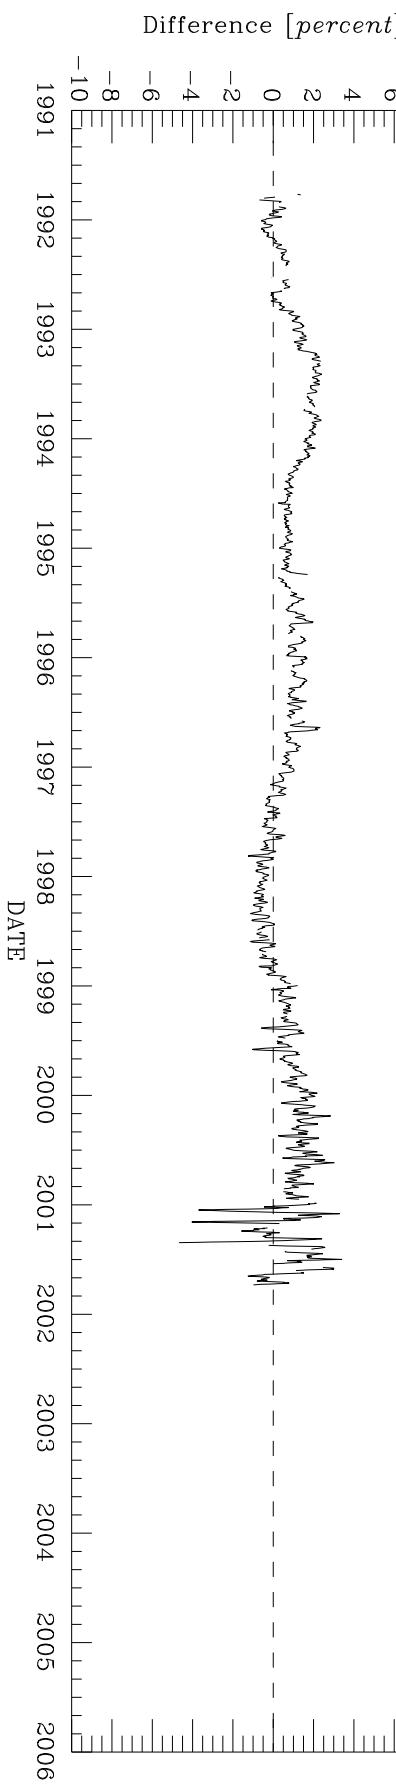

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

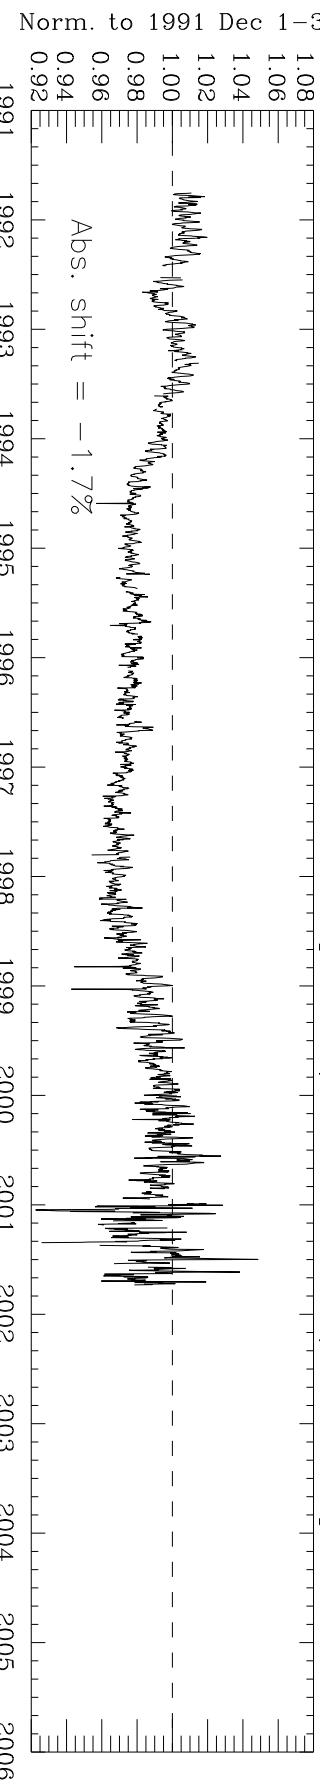

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

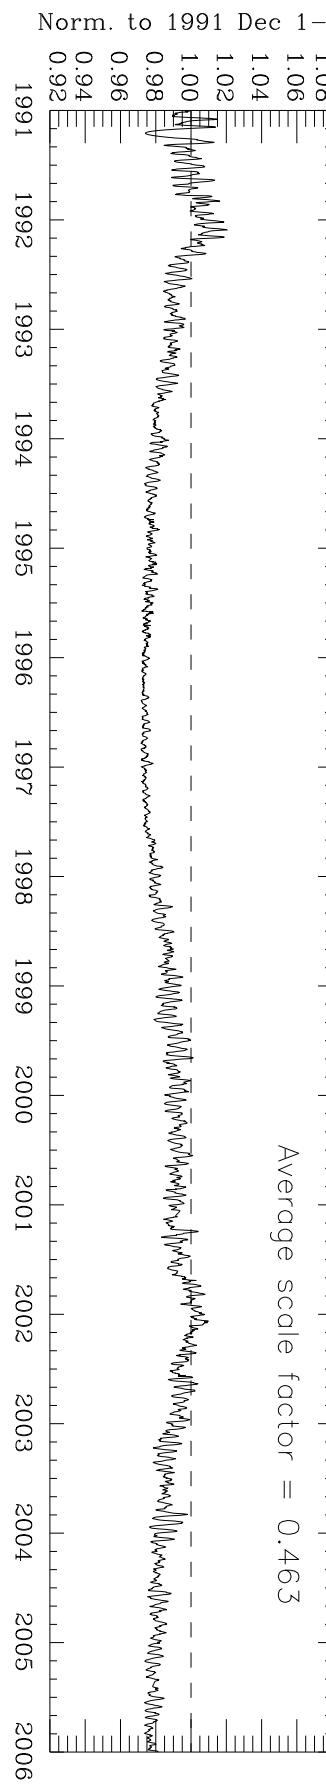

Solar Irradiance Comparison: 230–234 nm

UARS SOLSTICE V18 Irradiance Data [19 samples screened in plot window]

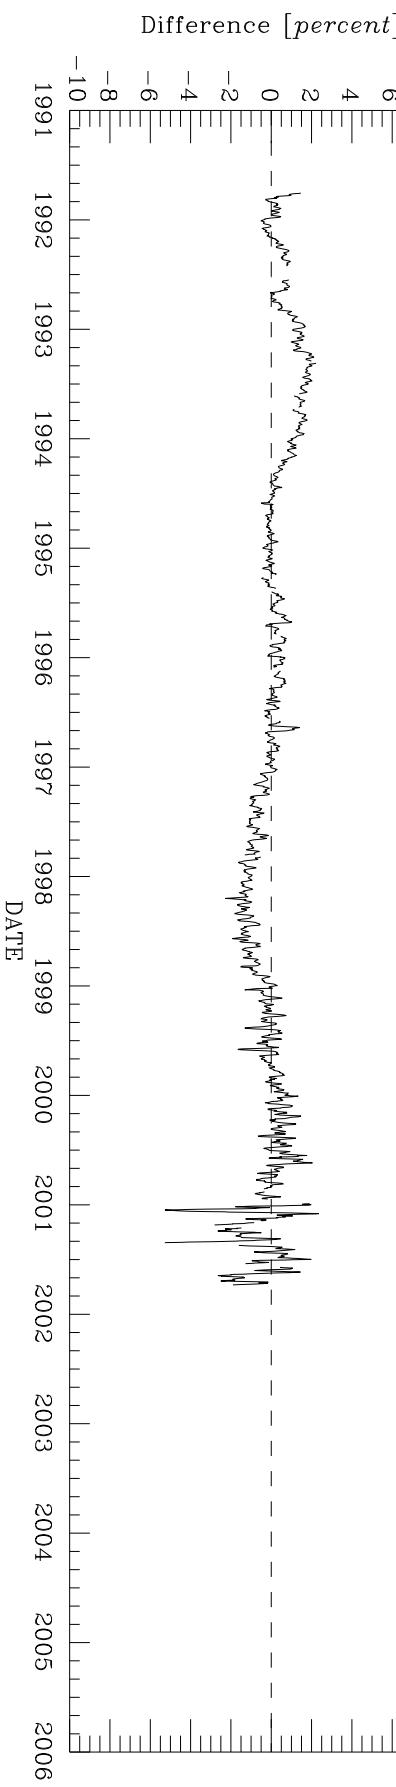

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

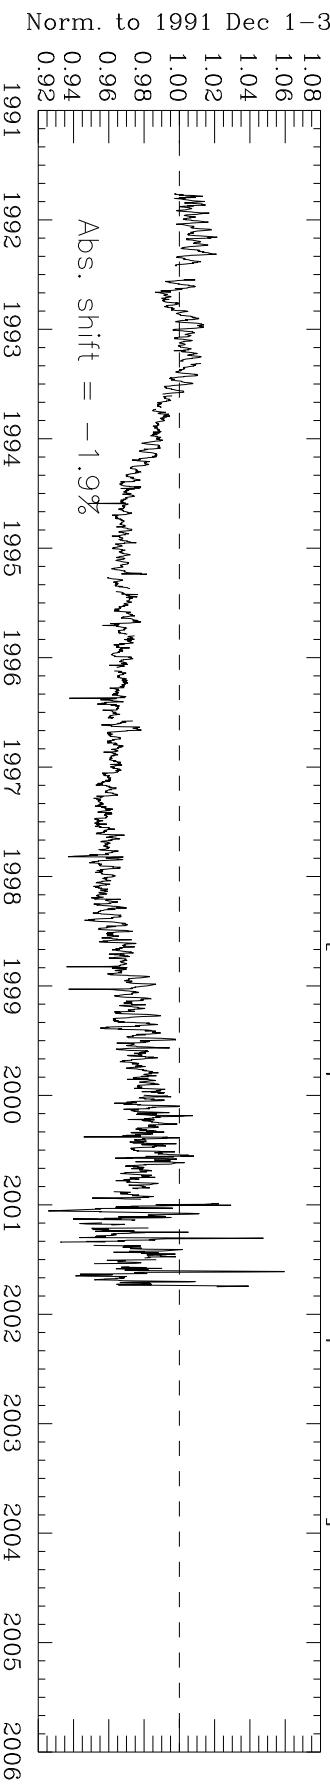

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

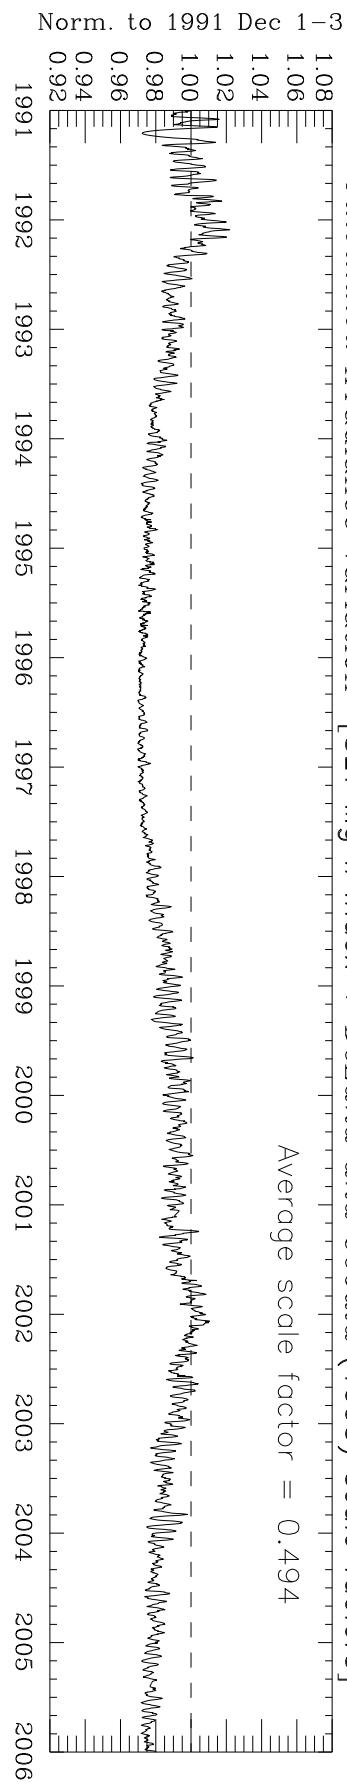

Solar Irradiance Comparison: 235–239 nm

UARS SOLSTICE V18 Irradiance Data [22 samples screened in plot window]

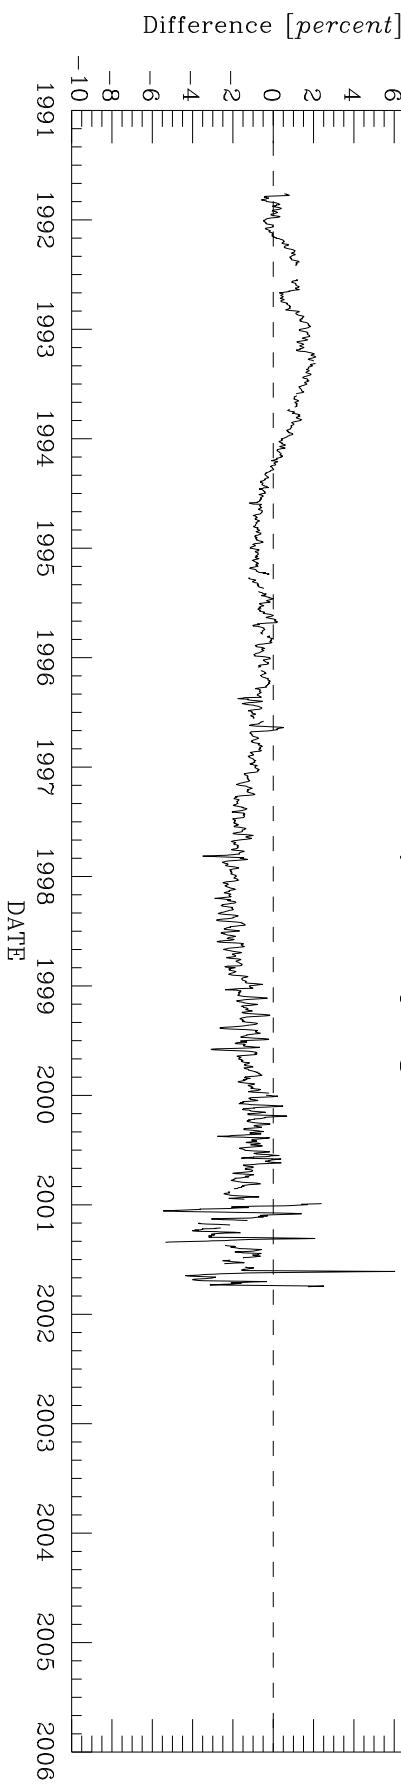

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

Average scale factor = 0.494

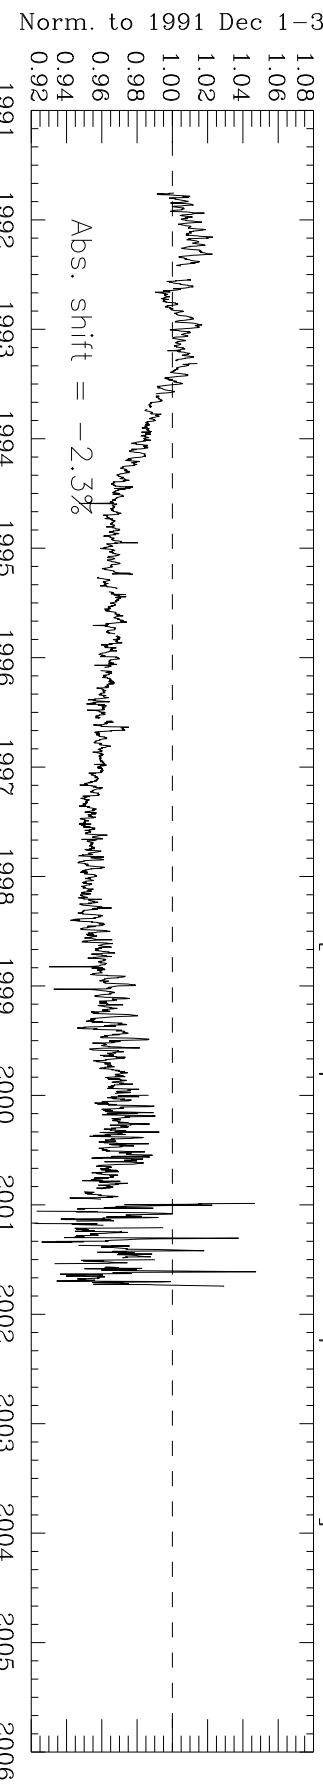

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

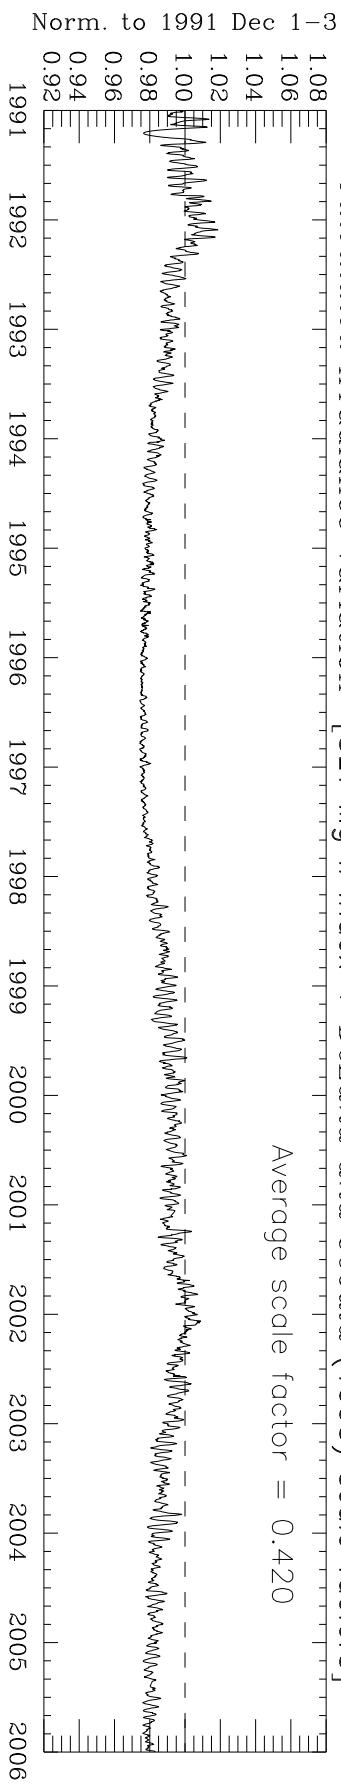

Solar Irradiance Comparison: 240–244 nm

UARS SOLSTICE V18 Irradiance Data [27 samples screened in plot window]

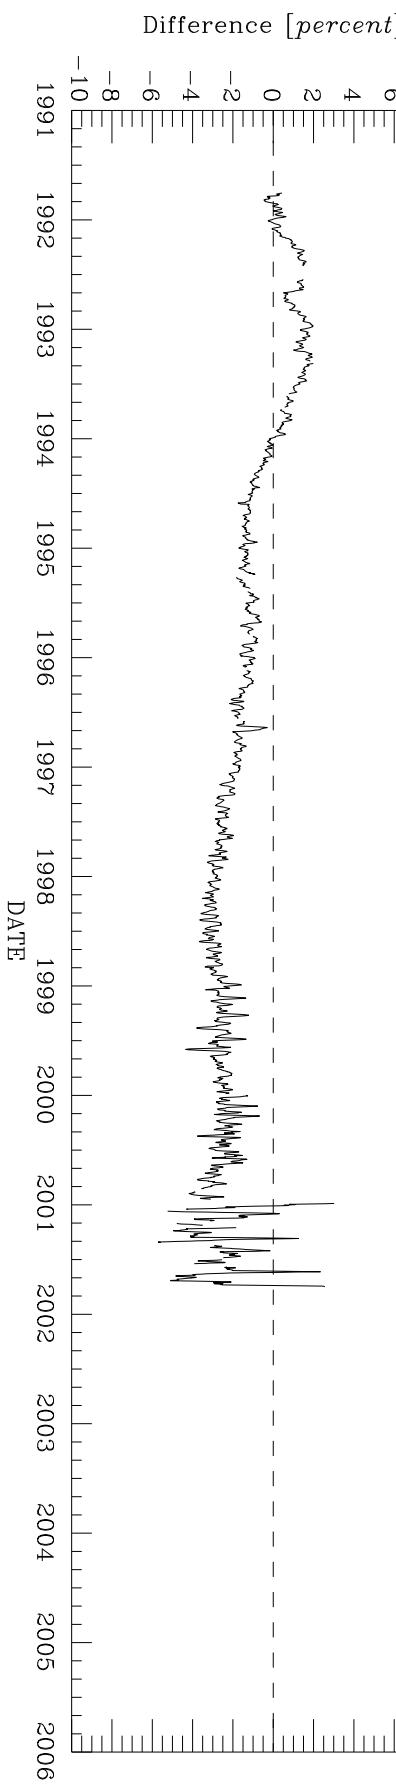

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

Average scale factor = 0.420

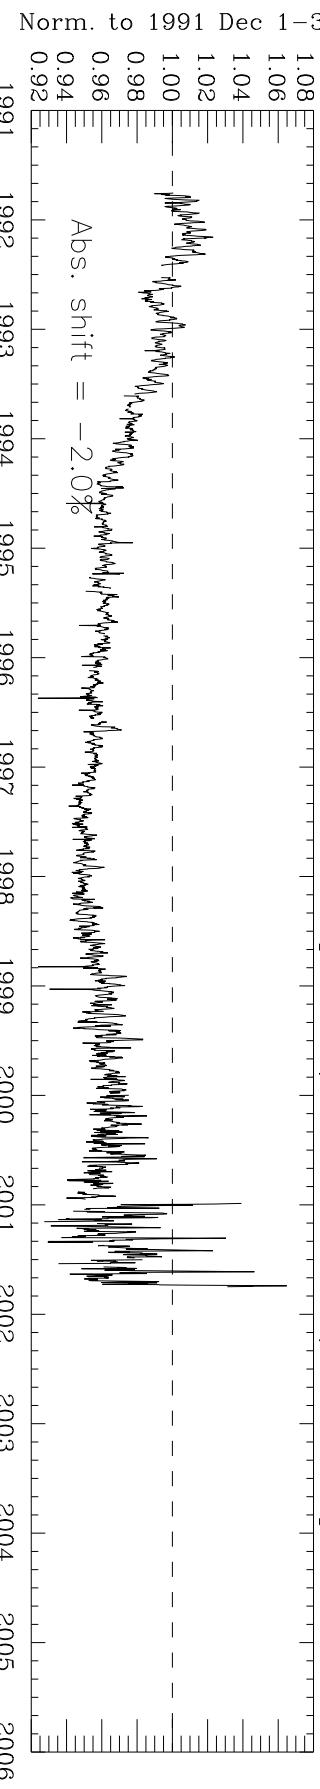

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

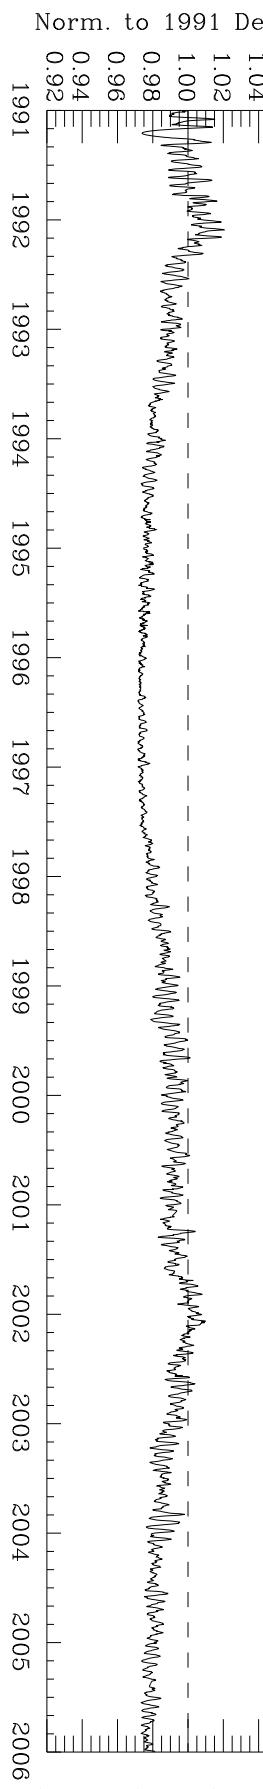

Solar Irradiance Comparison: 245–249 nm

UARS SOLSTICE V18 Irradiance Data [28 samples screened in plot window]

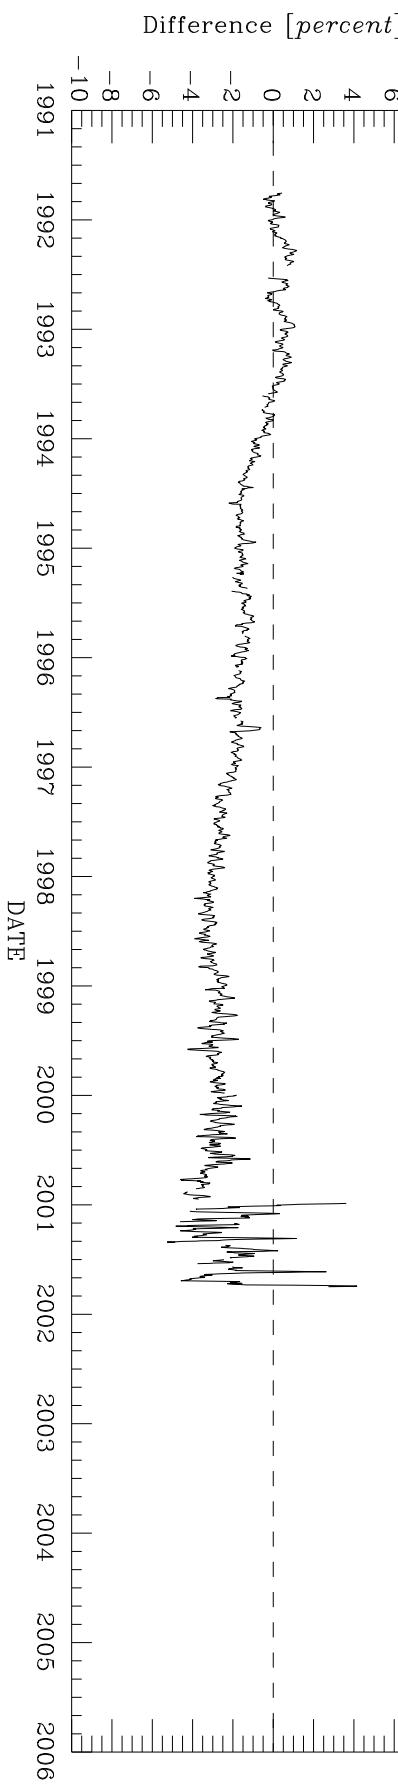

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

Average scale factor = 0.466

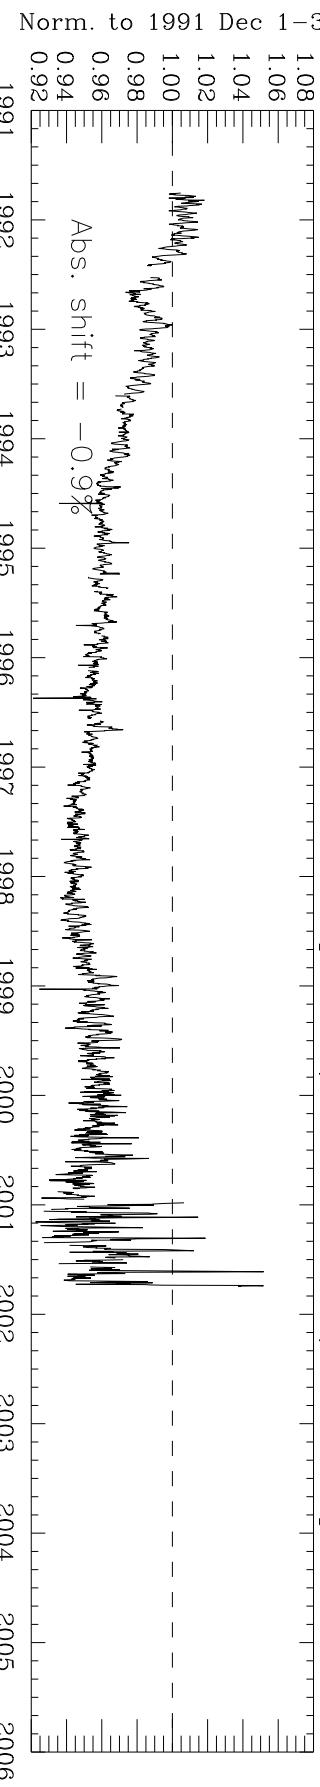

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation

5-day running avg.

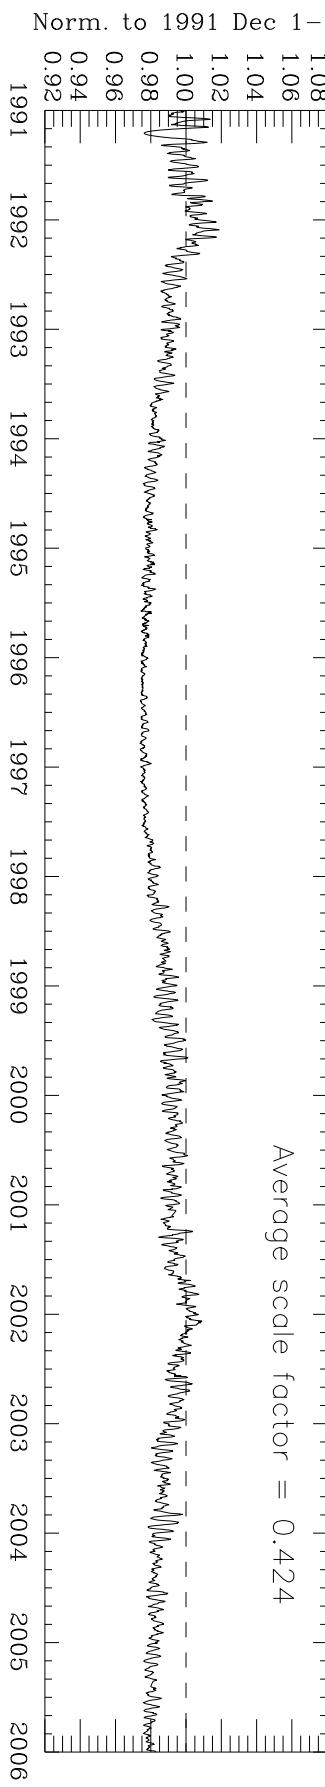

Solar Irradiance Comparison: 250–254 nm

UARS SOLSTICE V18 Irradiance Data [28 samples screened in plot window]

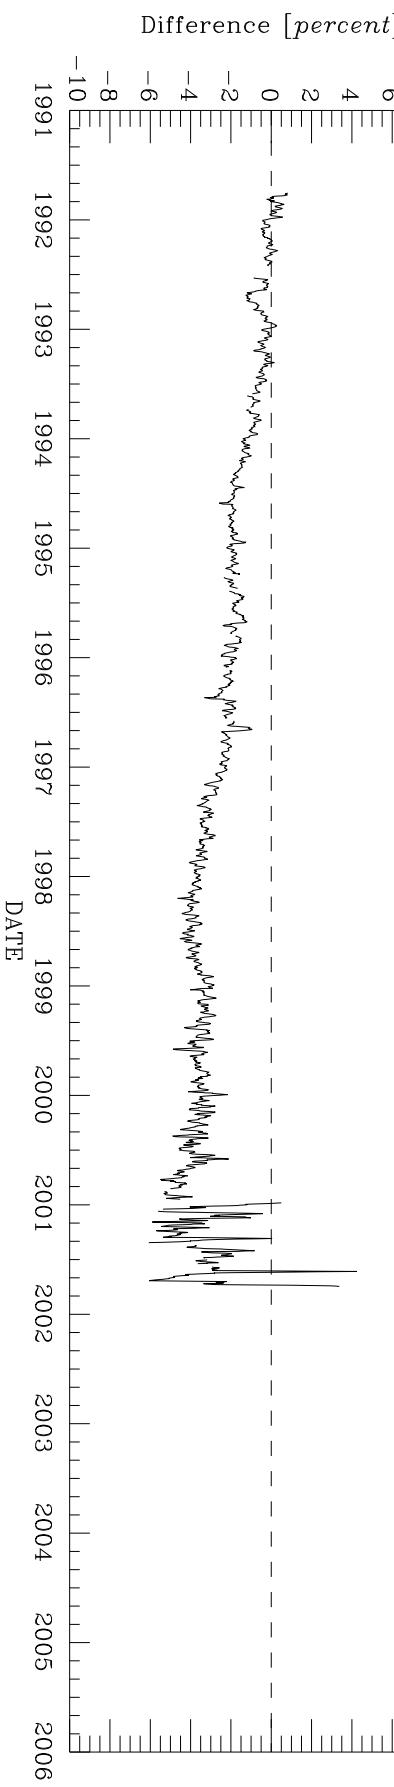

Calculated Irradiance Variation [SET Mg II index + DeLand and Cebula (1993) scale factors]

Average scale factor = 0.424

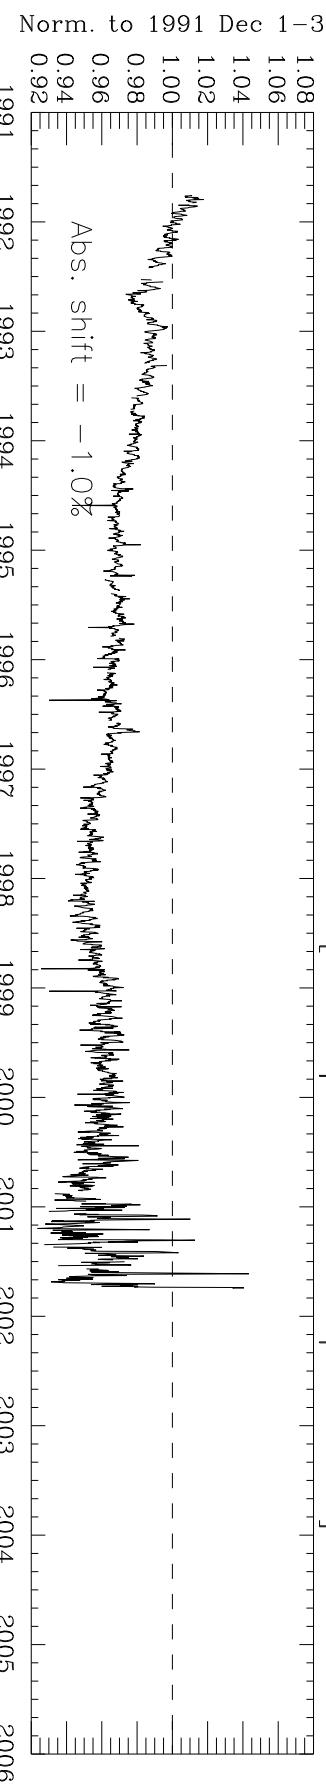

DIFFERENCE: UARS SOLSTICE V18 – Calculated Solar Variation
